Mariner, G. Kurt Piehler, 2009 Drawing on the latest research on the atomic bomb and its history the contributors to this provocative collection of eighteen essays set out to answer two key questions First how did the atomic bomb a product of unprecedented technological innovation rapid industrial scale manufacturing and unparalleled military deployment shape U.S. foreign policy the communities of workers who produced it and society as a whole And second how has American society's perception that the bomb is a means of military deterrence in the Cold War era evolve under the influence of mass media scientists public intellectuals and even the entertainment industry In answering these questions *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb the role of women working at Los Alamos the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb and the development of Cold War ideology the image of the bomb that was conveyed in the popular media and the connection of the bomb to the commemoration of World War II As it illuminates the cultural social political environmental and historical effects of the creation of the atomic bomb this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone even if only a few are empowered to manage it Rosemary B. Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G. on the Manhattan Project gives a concise fast paced account of all major aspects of the project at a level accessible to an undergraduate college or advanced high school student familiar with some basic concepts of energy atomic structure and isotopes The text describes the underlying scientific discoveries that made nuclear weapons possible how the project was organized the daunting challenges faced and overcome in obtaining fissile uranium and plutonium and in designing workable bombs the dramatic Trinity test carried out in the desert of southern New Mexico in July 1945 and the bombings of

Hiroshima and Nagasaki **Atomic Bomb Island** Don A. Farrell, 2021-01-15 Atomic Bomb Island tells the story of an elite top secret team of sailors airmen scientists technicians and engineers who came to Tinian in the Marianas in the middle of 1945 to prepare the island for delivery of the atomic bombs then being developed in New Mexico to finalize the designs of the bombs themselves and to launch the missions that would unleash hell on Japan Almost exactly a year before the atomic bombs were dropped strategically important Tinian was captured by Marines because it was only 1 500 miles from Japan and its terrain afforded ideal runways from which the new B 29 bombers could pound Japan In the months that followed the U S turned virtually all of Tinian into a giant airbase with streets named after those of Manhattan Island a Marianas city where the bombs could be assembled the heavily laden B 29s could be launched and the Manhattan Project scientists could do their last work Don Farrell has done this story incredible justice for the 75th anniversary The book is a thoroughly researched beautifully illustrated mosaic of the final phase of the Manhattan Project from the Battle of Tinian and the USS Indianapolis to Hiroshima and Nagasaki **Cosmopolitans** Fred Rosenbaum, 2009-11-05 Levi Strauss A L Gump Yehudi Menuhin

The Triumph of Fear Patrick G. Eddington, Policy Analyst
Homeland Security and Civil Liberties Patrick G Eddington, 2025 The Triumph of Fear is a history of the rise and expansion of surveillance and related political repression in the United States from the 1890s to 1961 Anarchist movements and especially the assassination of President McKinley spurred the expansion of nascent federal surveillance capabilities but persistent exaggerations of threats in times of peace and war exponentially increased the size and scope of unlawful government surveillance and political repression which has continued to the present Drawing on declassified government documents and other primary sources many analyzed for the first time Patrick Eddington offers surprising new revelations about the depths of government surveillance programs and abuses of power Eddington's analysis makes clear that the driving force behind these developments was fear on the part of the executive branch members of Congress and those on the federal bench Fear that challenges to existing political economic or social paradigms would alter the country in ways that would disempower those who benefitted from the status quo From Theodore Roosevelt's misuse of the Secret Service to spy on his political opponents to Dwight Eisenhower's approval of FBI subversion operations Eddington pinpoints the critical junctures that have jeopardized American civil liberties
