*Rail Infrastructure Resilience* Rui Calcada,Sakdirat Kaewunruen,2022-06-28 Economic growth security and sustainability across Europe are at risk due to ageing railway infrastructure systems At present the majority of such systems are aging and some have even reached their initial design lives These issues align with a major challenge in civil engineering how to restore and improve urban infrastructure and built environments Policy environmental and physical barriers must be addressed and overcome The complex and interconnected nature of the problem means that there is a need for academia industry communities and governments to work collaboratively The challenges posed by extreme events from natural and man made disasters are urgent Rail Infrastructure Resilience A Best Practices Handbook presents developed improvement methods for rail infrastructure systems toward resilience to extreme conditions It shows how best to use new information in the engineering design maintenance construction and renewal of rail infrastructure resilience through knowledge exchange and capability development The book presents the outcome of a major European research project known as the RISEN project

RISEN aimed to enhance knowledge creation and transfer using both international and intersectoral secondment mechanisms among European Advanced Rail Research Universities and SMEs and Non EU leading rail universities providing methodological approaches and practical tools for restoring and improving railway infrastructure systems for extreme events Edited and written by members of this project this book will be essential reading for researchers and practitioners hoping to find practical solutions to the challenges of rail infrastructure resilience Offers a best practices handbook for rail infrastructure resilience from the leaders in the field Paints a holistic picture of the rail transport system showing that infrastructure maintenance intervention can be enhanced through advanced monitoring systems and resilience design Presents rail infrastructure resilience and advanced condition monitoring allowing a better understanding of the critical maintenance renewal and retrofit needs of railways Considers how academia industry communities and governments can work collaboratively in order to tackle aggregated problems in rail infrastructure resilience Presents the findings from the RISEN project the leading European project on enhancing knowledge creation and transfer of expertise on rail infrastructure resilience

**Theory and Design of Railway Truss Bridges** John F. Unsworth, 2025-06-17 Railroad bridges are a critical component of the infrastructure and economy of many countries and many of these bridges are nearing the end of their useful service life Theory and Design of Railway Truss Bridges provides comprehensive coupled information regarding the structural analysis and design of steel railway truss spans Most books cover either analysis or design of structures but none cover both the analysis and design of railway trusses Further the book presents technical information on the analysis of railway trusses currently unavailable in other modern books It also provides readers with up to date information concerning the modern methods of design recommended by the American Railway Engineering and Maintenance of Way Association AREMA Includes detailed information on the analysis of trusses for moving loads Presents information on topics specific to railway trusses such as loading effects secondary stresses and stress reversal Includes information on the history of railway truss analysis design and construction Covers methods for the analysis of statically indeterminate spans Describes methods to determine the displacement of truss spans Provides up to date theory and design methods based on current AREMA recommendations

**Track Design Handbook for Light Rail Transit**, 2012 TCRP report 155 provides guidelines and descriptions for the design of various common types of light rail transit LRT track The track structure types include ballasted track direct fixation ballastless track and embedded track The report considers the characteristics and interfaces of vehicle wheels and rail tracks and wheel gauges rail sections alignments speeds and track moduli The report includes chapters on vehicles alignment track structures track components special track work aerial structures bridges corrosion control noise and vibration signals traction power and the integration of LRT track into urban streets

**Automation in Construction toward Resilience** Ehsan Noroozinejad Farsangi, Mohammad Noori, Tony T.Y. Yang, Paulo B. Lourenço, Paolo Gardoni, Izuru Takewaki, Eleni Chatzi, Shaofan Li, 2023-09-29 While the word automation may conjure images of robots taking over jobs the

reality is much more nuanced In construction for instance automation is less likely to diminish employment opportunities than it is to increase productivity Indeed automation alongside the global need for new and updated infrastructure and better and more affordable housing can help shape the direction of the construction industry The key will be anticipating and preparing for the shift in part by developing new skills in the current and future workforce This book presents all aspects of automation in construction pertaining to the use of information technologies in design engineering construction technologies and maintenance and management of constructed facilities The broad scope encompasses all stages of the construction life cycle from initial planning and design through the construction of the facility its operation and maintenance to the eventual dismantling and recycling of buildings and engineering structures Features Examines Building Information Management systems allowing on site execution of construction more efficient and for project teams to eliminate mistakes and better coordinate the workforce Presents the latest information on the automation of modular construction production in factories including 3 D printing of components such as facades or even load bearing and essential components

**Sustainable Rail Transport 4** Marin Marinov, Janene Piip, 2021-12-16 This book offers a timely collection of articles on innovative research and developments in the vast field of rail transport including rail operations management economics vehicles interior design and sustainable infrastructure It addresses academics and professionals specializing in railway transport analysis innovation systems design and new technology Continuing on the tradition of the previous volumes the book reports on innovative solutions for energy saving noise reduction and baggage handling It elaborates on the implementation of digital technologies and discusses sustainable rail operations along transport corridors The concept of hyperloop is also discussed as a possible transport mode of the future All the contributions were selected through an internal competition and a double blinded peer review process organized by the RailUniNet members

Bearing Capacity of Roads, Railways and Airfields Andreas Loizos, Imad Al-Qadi, Tom Scarpas, 2017-07-20 Bearing Capacity of Roads Railways and Airfields includes the contributions to the 10th International Conference on the Bearing Capacity of Roads Railways and Airfields BCRRA 2017 28 30 June 2017 Athens Greece The papers cover aspects related to materials laboratory testing design construction maintenance and management systems of transport infrastructure and focus on roads railways and airfields Additional aspects that concern new materials and characterization alternative rehabilitation techniques technological advances as well as pavement and railway track substructure sustainability are included The contributions discuss new concepts and innovative solutions and are concentrated but not limited on the following topics Unbound aggregate materials and soil properties Bound materials characteristics mechanical properties and testing Effect of traffic loading In situ measurements techniques and monitoring Structural evaluation Pavement serviceability condition Rehabilitation and maintenance issues Geophysical assessment Stabilization and reinforcement Performance modeling Environmental challenges Life cycle assessment and sustainability Bearing Capacity of Roads Railways and Airfields is essential reading for academics and professionals involved or interested
