

10 OXYGEN SAFETY TIPS TO FOLLOW AT HOME

If you use supplemental oxygen at home, it is important to know how to do so safely.

WHETHER YOU USE

Portable oxygen

Liquid oxygen

Concentrator

Keep the following safety tips in mind to ensure you use oxygen therapy as safely as possible.

#1 Do not smoke near oxygen
Oxygen makes fires ignite more easily and burn hotter.

Never smoke or allow open flames while using oxygen.

#2 Stay away from heat sources and open flames
Any flame or heat source could be a risk when oxygen is in use.

Stay 5-10 feet away from all flames, heat sources, and open flames.

#3 Use water-based products
Avoid all flammable oxygen therapy products when using oxygen therapy.

Lotions, ointments and other products may contain flammable oils or liquids.

#4 Store oxygen delivery devices safely
If you use oxygen, store them upright in a secure storage device.

All oxygen delivery devices should be stored in a secure, upright position in a well-ventilated area.

#5 Turn oxygen delivery devices off
Make sure your oxygen provider shows you how to turn everything off correctly.

Oxygen delivery devices must be turned off correctly to avoid asphyxiation or fire.

#6 Avoid anything that sparks
Sparks ignite more easily in an oxygen-rich environment using oxygen therapy.

Sparks can be produced by lighters, matches, electric razors, toothbrushes, hair dryers, or toys.

#7 Maintain functioning smoke detectors
Smoke detectors should be checked at least monthly.

Ensure you have a fire escape plan and know how to use them.

#8 Follow safety protocols
Make sure you understand safety practices completely, and clarify if necessary.

Ask your oxygen provider to review safety practices and supplemental oxygen correctly.

#9 Tell your power company you use supplemental oxygen
Ask how to get help if you lose power.

Your power company might have a plan for you in case of a power outage.

#10 Avoid creating oxygen-rich environments
Oxygen-rich environments with poor ventilation like closets, cabinets, or car trunks.

Keep oxygen delivery devices in a well-ventilated area and never use them near clothing or other material.
