Sorrentino,Leighann Remmert,2020-03-03 UPDATED New chapter organization breaks material into manageable portions improving your ability to retain important information Interpersonal Understanding in Historical Context ,2009-01-01 Understanding students historical understanding is a complex and challenging endeavour for history teachers as well as for researchers from diverse fields Since historical situations contain interpersonal and social issues that happened in the past not only history educators are interested in how students understand them Also psychologists and educational scientists aim to gain knowledge how students deal with interpersonal issues in the context of history The present book shows in which way historical understanding can be viewed as interpersonal understanding and gives indications for the limitation of an interpersonal approach regarding historical situations The different contributions of this volume give insight into an interdisciplinary discussion about how the fields of social and historical thinking are interrelated with respect to educational issues and challenges This book confirms the impression of an increase in empirical work in the domain of history education The authors present empirical approaches from the fields of history education developmental psychology and educational science using different theoretical and methodical means and thus contribute to a larger picture of what teaching and learning history at school is about **Development, Security, and Aid** Jamey Essex,2013-03-01 In Development Security and Aid Jamey Essex offers a sophisticated study of the U S Agency for International Development USAID examining the separate but intertwined discourses of geopolitics and geoeconomics Geopolitics concentrates on territory borders and strategic political and military positioning within the international state system Geoeconomics emphasizes economic power growth and connectedness within a global and supposedly borderless system Both discourses have strongly influenced the strategies of USAID and the

views of American policy makers bureaucrats and business leaders toward international development Providing a unique geographical analysis of American development policy Essex details USAID s establishment in 1961 and traces the agency s growth from the Cold War into an era of neoliberal globalization up to and beyond 9 11 the global war on terror and the looming age of austerity USAID promotes improvement for millions by providing emergency assistance and support for long term economic and social development Yet the agency s humanitarian efforts are strongly influenced and often trumped by its mandate to advance American foreign policies As a site of a strategy for and an agent in the making of geopolitics and geoeconomics USAID Essex argues has often struggled to reconcile its many institutional mandates and objectives The agency has always occupied a precarious political position one that is increasingly marked by the strong influence of military corporate and foreign policy institutions in American development strategy

P. Simpson,2015-04-08 This book deconstructs the story of

liberalism that John Rawls author of Political Liberalism and many others have put forward Peter L P Simpson argues that political liberalism is despotic because it denies to politics a concern with the comprehensive human good political illiberalism overcomes this despotism and restores genuine freedom In Political Illiberalism Simpson provides a detailed account of these political phenomena and presents a political theory opposed to that of Rawls and other proponents of modern liberalism Simpson analyzes and confronts the assumptions of this liberalism by challenging its view of liberty and especially its cornerstone that politics should not be about the comprehensive good He presents the fundamentals of the idea of a truer liberalism as derived from human nature with particular attention to the role and power of religion using the political thought of Aristotle the founding fathers of the United States thinkers of the Roman Empire and contemporary practice Political Illiberalism concludes with reflections on morals in the political context of the comprehensive good Simpson views the modern state as despotically authoritarian consequently seeking liberty within it is illusory Human politics requires devolution of authority to local communities on the one hand and a proper distinction between spiritual and temporal powers on the other This thought provoking work is essential for all political scientists and philosophy scholars **American Machinist**, 1918
