Spencer, 2022-01-13 How we come to our conclusions about ethical issues matters as much as the specific policies or practices we commend This book argues that four key doctrines form a theological perspective for environmental ethics They are the key ideas upon which people build their ethics of the environment By looking at the doctrines of revelation creation

anthropology and eschatology we can find points of contact to work together more effectively for the common good and have more meaningful debates when our positions differ This book uses examples from four different theological positions ecotheology theological liberalism fundamentalism and evangelicalism to show that a creation positive ethic is possible from all of these positions and it explores why people who stand within various theological streams may engage in environmental issues in diverse ways *Plundering Eden* G. P. Wagenfuhr, 2020-05-22 Christian ecotheology runs the risk of making God himself a resource for human exploitation as a means to species survival The world of climate change soil depletion and mass species extinction reveals a frightening conclusion humans act as cosmic parasites The problem is not with the world talk of climate change blames the symptoms displayed by the victim but with human epistemology Humans are systematically incapable of rightly perceiving reality and so must socially construct reality The end of this epistemological problem is necessary ecological devastation by the development of civilization In *Plundering Eden* Wagenfuhr traces ecological problems to their root cause in the broken imagination and argues that reconciliation with God the Creator through Jesus Christ is the only means to ecological healing through a renewed kenotic imagination expressed in the creation of an alternate environment that reveals the kingdom of God the ekklesia *The Violence of Climate Change* Kevin J. O'Brien, 2017-06-01 Climate change is viewed as a primarily scientific economic or political issue While acknowledging the legitimacy of these perspectives Kevin J O'Brien argues that we should respond to climate change first and foremost as a case of systematic and structural violence Global warming is largely caused by the carbon emissions of the affluent emissions that harm the poor first and worst Climate change is violence because it divides human beings from one another and from the earth O'Brien offers a constructive and creative response to this violence through practical examples of activism and nonviolent peacemaking providing brief biographies of five Christians in the United States John Woolman Jane Addams Dorothy Day Martin Luther King Jr and Cesar Chavez These activists idealism social commitment and political savvy offer lessons of resistance applicable to the struggle against climate change and for social justice *Wendell Berry and Higher Education* Jack R. about the university's mission Throughout Baker and Bilbro argue that instead of training students to live in their careers universities should educate students to inhabit and serve their places The authors also offer practical suggestions for how students teachers and administrators might begin implementing these ideas Baker and Bilbro conclude that institutions guided by Berry's vision might cultivate citizens who can begin the work of healing their communities graduates who have been educated for responsible membership in a family a community or a polity

Hope in the Age of Climate Change Chris Doran, 2017-04-27 It is difficult to be hopeful in the midst of daily news about the effects of climate change on people and our planet While the Christian basis for hope is the resurrection of Jesus unfortunately far too many American Protestant Christians do not connect this belief with the daily witness of their faith This book argues that the resurrection proclaims a notion of hope that should be the foundation of a theology of creation care that manifests itself explicitly in the daily lives of believers Christian hope not only inspires us to do great and courageous things but also serves as a critique of current

systems and powers that degrade humans nonhumans and the rest of creation and thus cause us to be hopeless Belief in the resurrection hope should cause us to be a different sort of people Christians should think purchase eat and act in novel and courageous ways because they are motivated daily by the resurrection of Jesus This is the only way to be hopeful in the age of climate change [T&T Clark Handbook of the Doctrine of Creation](#) ,2024-03-07 The T how the doctrine of creation informs and is informed by various dogmatic commitments and how the doctrine of creation relates to a range of human concerns and activities The Handbook represents a celebration of fascination with bewilderment at lament about and hope for all that is and serves as a scholarly innovative and constructive reference for those interested in attending to what Christian belief has to contribute to thinking about and living with the mysterious existence named creation **Troubling Topics, Sacred Texts** Roberta Sterman Sabbath,2021-10-04 Abrahamic scriptures serve as cultural pharmakon prescribing what can act as both poison and remedy This collection shows that their sometimes veiled but eternally powerful polemics can both destroy and build exclude and include and serve as the ultimate justification for cruelty or compassion Here scholars not only excavate these works for their formative and continuing cultural impact on communities identities and belief systems they select some of the most troubling topics that global communities continue to navigate Their analysis of both texts and their reception help explain how these texts promote norms and build collective identities Rejecting the notion of the sacred realm as separate from the mundane realm and beyond critical challenge this collection argues both implicitly and sometimes transparently for the presence of the sacred within everyday life and open to challenge The very rituals prayers and traditions that are deemed sacred interweave into our cultural systems in infinite ways Together these authors explore the dynamic nature of everyday life and the often brutal power of these texts over everyday meaning
