Liminality in Tourism Robert S. Bristow, Ian Jenkins, 2021-09-05 Liminality is not typically associated with tourism even though it can be viewed as an intrinsic element of the social cultural experiences of tourism Liminality in Tourism Spatial and Temporal Considerations aims to build upon the tradition of liminality as expounded in social and anthropological disciplines elaborating on the theoretical principles and concepts found within certain aspects of the tourist

journey and tourist product The emergence of post modern society has impelled a change in the tourist gaze towards a more experiential and adventuresome globalised experience An important aspect of the tourist phenomenon of liminality is where a transformative experience is triggered by entering a liminoid tourist space leaving the tourist permanently psychologically transformed before returning to normalised society. The narrative provides a new perspective on the tourist experience with a provocative examination into the multidimensional aspects of tourism by exploring tourism within the spatial and temporal aspects of liminal landscapes Covid 19 has further changed the rubric of tourism Until the current pandemic tourism has basically been a fun experience In a post pandemic world however the tourist is now facing an unknown future which will almost certainly affect tourism liminality This book presents the reader with a wealth of examples and case studies closely illustrating the association between tourism and liminal experiences. The geographical perspectives explore the more subconscious outcomes of destination and tourist product consumption The book should be a useful reader to tourism geography where the theory of liminality can be synthesized into tourist experiences. The chapters in this book were originally published as a special issue of the journal Tourism Geographies Women and Sex Tourism Landscapes Erin Sanders-McDonagh, 2016-08-12 Sexual spaces normally inhabited by mostly female sex workers are understood as masculine spaces and positioned for and around male consumers However red light zones and public sex performances in both Thailand and Holland are being explored and visually consumed by female tourists in significant numbers. Their presence in red light districts and sexual venues is at odds with the ways in which sexual spaces have normally been positioned Woman and Sex Tourism Landscapes explores female tourists interactions with highly sexualized spaces and places in two very different contexts the Netherlands and Thailand Addressing this incongruence this text explores the ways in which these spaces are constructed and examines the different relations that govern the management of and female tourist interactions with these liminal sexual zones Ethnographic data collected in both countries suggests that far from being male centred spaces the red light districts and associated sexual entertainment venues are very much open to female tourists Drawing on this research the author argues that some women are indeed interested in exploring sexualized zones challenging assumptions about women's involvements with sexual space Thinking specifically about the visual nature of women's sexualized experiences the analysis draws on a range of different theoretical understandings that address power privilege and the gaze An important contribution to a range of debates this book will appeal to students and researchers in tourism geography sociology gender studies and cultural theory The Unofficial Guide to Washington, D.C. Eve Zibart, Renee Sklarew, Len Testa, 2016-02-23 A guide to hotels and attractions in Washington D C Globalisation and Services-driven Economic Growth Niels Beerepoot, Bart Lambregts, Jana Kleibert, 2016-07-28 Following drastic shifts in the spatial organization of goods production increasingly fierce competition now forces firms also to look critically at how to organize the production of services While digitization and advances in information and communication technologies have enabled firms to unbundle service production

processes the increased global availability of skilled labour allows for the relocation of ever more of these processes around the world As a result a new geography of services production takes shape a geography that is defined by new interregional and international divisions of labour and held together by increasingly complex global services production networks This book examines how the reorganisation of services production alters relations between and generates different sets of challenges and opportunities for economic development in the Global North and the Global South Drawing from 11 case studies probing various aspects of services production in different parts of the world the book brings out the remarkable heterogeneity and transformative capacities of services It successively shows how global trade in services creates new interdependencies between services producing and services consuming regions reveals how services help to mitigate the impact of and contribute to recovery from economic crises in the Global North and demonstrates how services offshoring fosters economic development and service sector driven modernisation processes in the Global South The book s openness to the heterogeneous and dynamic nature of services production enlarges our understanding of which particular services in which spatiotemporal context have the capacity to generate good jobs contribute to productivity and drive economic growth The book stands out from other books in the field in that it combines perspectives on services driven transformations from both the Global North and the Global South and looks into the role of various services segments Based on pioneering empirical research and original data it offers a timely contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services services offshoring services driven growth and socioeconomic transformations in the Global North and South <u>Time Out Amsterdam</u> The Editors of Time Out, 2014-11-17 Europe s most infamous city remains one of its most popular and not without good reason between its world class art museums its eminently wanderable canals and its coffee shops that don't exactly specialize in coffee its variety is glorious indeed However with one of Europe s more forward thinking cultural scenes and striking new architectural developments in IJburg and the Bijlmermeer there s much more here to enjoy than the clich s written researched and edited entirely by locals the Time Out Amsterdam guide will tell travelers all about it Highlights Amsterdam after dark the best restaurants bars and nightclubs in the city but also the ones to avoid Mini guides to the city s most notable works of art and where to find them An unmatched section on the city's modern day cultural scene galleries and performance art classical music and theater An in depth look at the city's stunning new urban architecture Trips Beyond Amsterdam to the flower auction in Aalsmeer the cheese market at Gouda and the windmills of Alblasserdam and also to the fizzing modern city of Rotterdam A Research Agenda for **Tourism and Risk** Claudia Seabra, Maximiliano E.
