An Altar In The Wilderness An Rmb Manifesto:

An Altar in the Wilderness Kaleeg Hainsworth, 2014 Father Kaleeg Hainsworth an Eastern Orthodox priest with a lifetime of experience in the Canadian wilderness grounds this manifesto in the literary philosophical mystical and historical teachings of the spiritual masters of both East and West outlining the human experience of the sacred in nature The spiritual ecology described here is fully engaged with the wilderness beyond our backyards it is an ecology which takes in nature as red in tooth and claw and offers a way forward in the face of accelerating climate change This manifesto also challenges our modern self conception as dominators or stewards of the natural world claiming these roles emerged from western industrial history and are directly responsible for the environmental damage and alienation from nature we know today The ecological scope of this book begins with a meditation on natural beauty as the divine that breathes through all aspects of life We discover along the way that awe and mystery are so vital to the human experience of the natural world that without them we are doomed to treat nature as little more than a resource a science or a playground for recreation alone Instead a new role emerges from these pages one which accounts for the sacred in nature and places us in relationship to the world of which we are inextricably a part This role is a priestly one and Father Hainsworth outlines the significance and benefits of it in detail while also offering a vision of life in which a human being stands in the world of nature as at an altar built in the wilderness a sacred offering in a holy place Living in an Icon Robert Gottfried, Frederick W. Krueger, 2019-08-17 Helps bridge the gap between love of God and love of nature Many people experience God most strongly in nature but do not know how to incorporate this experience into their spiritual life Others question whether Christianity has room for nature at all and seek alternatives elsewhere often leaving Christianity entirely This book addresses this crucial issue by providing a resource for fostering a closer relationship with God and creation With a step by step approach this book provides a framework integrating asceticism with the contemplation of nature Each chapter contains a take it home section for applying the lessons learned outdoors to everyday life connecting God and nature as seamless components of spirituality Topics include gratitude delight appreciation wonder discernment reverence mortality love beauty humility silence and hope The Columbia River Treaty: A Primer Robert William Sandford, Deborah Harford, Jon O'Riordan, 2014 The Columbia River Treaty A Primer is a vital work that clearly explains the nature of this complex water agreement between Canada and the United States and how its impending update will impact communities landscapes industry and water supplies between the two countries for many years to come The Columbia River Treaty ratification in 1964 created the largest hydropower project in North America with additional emphasis on flood protection for the USA As the Treaty approaches its 60th anniversary and the first opportunity for modification its signatories are preparing proposals for new ways forward and stakeholders on both sides of the border are speaking up This primer explores the initial intent of the Treaty and its success to date its costs to Columbia Basin residents and ecosystems and new influences the signatories must now consider Shifts in social norms related to the

environment equity and social justice new views on the relevance of Indigenous traditional and local knowledge and the economic and physical effects of a changing climate are all considered as factors in future Treaty governance. The primer concludes with a summary of the perspectives that currently exist between and within each country with respect to Treaty benefits and outlines the next steps that will take place in the negotiation process. The authors conclude with a call to action in the hope that a renewed Columbia River Treaty might prove a model for outstanding transboundary water agreements around the world as they strive to meet not only the challenges of the present day but also the needs of future generations
