Correspondence 1750-1810, 2024-12-12 This is the second volume of the Wodrow Kenrick Correspondence 1750 1810 Reverend James Wodrow 1730 1810 minister of the Church of Scotland at Stevenston in Ayrshire and Samuel Kenrick 1728 1811 tutor to a Renfrewshire family until 1763 and subsequently a merchant and banker in Bewdley Worcestershire began corresponding around 1750 soon after leaving the University of Glasgow They continued to do so until James Wodrow's death in 1810 Their correspondence is an exceptionally rich resource for the study of British culture and society in the era of Enlightenment and revolutions here made easily available to scholars for the first time Samuel Kenrick lived in England from 1765 and the men only met again in 1789 so their friendship was carried out almost entirely on paper for forty five years The correspondence constitutes a remarkable record of a friendship In Volume 2 1784 1790 Wodrow and Kenrick were long established in successful careers and their daughters were now adults A major theme in this book is Mary Kenrick's visit to Scotland to stay with the Wodrow family in summer 1784 and Helen Nell Wodrow's return with her to Bewdley to become part of the Kenrick household until September 1785 Wodrow himself visited Bewdley on the only occasions he ever did this in early September and late October 1788 on his way to and from London to arrange for the publication of two volumes of the sermons of his mentor Principal William Leechman of Glasgow University As well as discussing family friendship and the practicalities of publishing the letters in this volume contain lively and highly readable exchanges on theology and church politics in Scotland and England university politics in Glasgow a wide range of contemporary literature and an enormous spectrum of famous and less well known politicians authors clergymen and local figures in Ayrshire and Worcestershire

Dictionary of National Biography Leslie Stephen, 1896 **The Enlightened Joseph Priestley** Robert E. Schofield, 2010-11 Joseph Priestley 1733 1804 is one of the major figures of the English Enlightenment A contemporary and friend of Benjamin Franklin and Thomas Jefferson he exceeded even these polymaths in the breadth of his curiosity and learning Yet no one has attempted an all inclusive biography of Priestley probably because he was simply too many persons for anyone easily to comprehend in a single study Robert Schofield has devoted a lifetime of scholarship to this task The result is a magisterial book covering the life and works of Priestley during the critical first forty years of his life Although Priestley is best known as a chemist this book is considerably more than a study in the history of science As any good biographer must Schofield has thoroughly studied the many activities in which Priestley was engaged Among them are

theology electricity chemistry politics English grammar rhetoric and educational philosophy Schofield situates Priestley the provincial dissenter within the social political and intellectual contexts of his day and examines all the works Priestley wrote and published during this period Schofield singles out the first forty years of Priestley's life because these were the years of preparation and trial during which Priestley qualified for the achievements that were to make him famous The discovery of oxygen the defenses of Unitarianism and the political liberalism that characterize the mature Priestley all are foreshadowed in the young Priestley A brief epilogue looks ahead to the next thirty years when Priestley was forced out of England and settled in Pennsylvania the subject of Schofield's next book But this volume stands alone as the definitive study of the making of Joseph Priestley

Revival: Health, Wealth, and Population in the early days of the Industrial Revolution (1926) Mabel Craven Buer, 2018-05-08 This book provides a comprehensive over view of eighteenth century British medical reform but as an economic historian Buer considered the effect of diseases and medical intervention on population growth not on medical ideas Other optimistic views of the century either focused like Buer on the standard of living debate or a related debate about the role if any of hospitals and public health measures in reducing mortality during the industrial revolution giving only passing attention to disease theory
