The Philosophical Basis of Religion John Watson, 1907 *Philosophical Foundations of Mixed Methods Research* Yafeng Shan, 2023-12-01 *Philosophical Foundations of Mixed Methods Research* provides a comprehensive examination of the philosophical foundations of mixed methods research. It offers new defences of the seven main approaches to mixed methods: the pragmatist approach, the transformative approach, the indigenous approach, the dialectical approach, the dialectical pluralist approach, the performative approach, and the realist approach, written by leading mixed methods researchers. Each approach is accompanied by critical reflections from philosophers' point of view. The book shows the value of the use of mixed methods from a philosophical point of view and offers a systematic and critical examination of these positions and approaches from a philosophical point of view. The volume also offers a platform to promote a dialogue between mixed methods researchers and philosophers of science and provides foundations for further research and teaching of this hotly debated topic. This volume is ideal for researchers and advanced students and anyone who is interested in research methods and the social sciences more generally.

Process and Pluralism Zhihe Wang, 2013-05-02 This book offers a uniquely process relational oriented Chinese approach to inter religious dialogue called Chinese Harmonism. The key features of Chinese harmonism are peaceful co existence, mutual transformation and openness to change. As developed with help from Whiteheadian process thought, Chinese harmonism provides a middle way between particularism and universalism, showing how diversity can exist within unity. Chinese harmonism is open to similarities among religions but it also emphasizes that differences among religions can be complementary rather than contradictory. Thus Chinese harmonism implies an attitude of respect for others and a willingness to learn from others without reducing the other to one's own identity, that is to sameness. By emphasizing the possibility of complementariness, a process oriented Chinese harmonism avoids a dichotomy between universalism and particularism represented respectively by John Hick and S Mark Heim and will make room for a genuine openness and do justice to the culturally and religiously other.

The Philosophical Foundations of Management Thought Jean-Etienne Joullié, Robert Spillane, 2015-11-19 This book proposes a review of important Western philosophies and their significance for managers management academics and management consultants Management theories taught in management schools that managers and consultants are supposed to apply are built upon different perspectives of the world man and society that are important not so much for what they lead to but for what they assume Although rarely made explicit these assumptions cannot be reconciled and are at the source of many incompatibilities that management academia has been busy ignoring or obfuscating The ability to evaluate critically these perspectives is essential to managers if they are to make sense of what experts profess however Moreover since management is primarily an exercise in communication managing is impossible in the darkness of an imprecise language in the absence of moral references or in the senseless outline of a world without intellectual bases Managing is an applied philosophical activity any attempt at repairing management academia and the practices it has

Smith, 2020-04-02 The law of Equity a latecomer to the field of private law theory raises fundamental questions about the relationships between law and morality the nature of rights and the extent to which we are willing to compromise on the rule of law ideal to achieve social goals In this volume leading scholars come together to address these and other questions about underlying principles of Equity and its relationship to the common law What relationships if any are there between the legal philosophical and moral senses of equity Does Equity form a second order constraint on law If so is its operation at odds with the rule of law Do the various theories of Equity require some kind of separation of law and equity and if they do what kind of separation The volume further sheds light on some of the most topical questions of jurisprudence that are embedded in the debate around fusion A noteworthy addition to the Philosophical Foundations series this volume is an important contribution to an ongoing debate and will be of value to students and scholars across the discipline *Foundations of Ophthalmology* Michael F.

Reality Javier Aranzadi, 2024-10-07 The dominant paradigm of the economy is based on homo economicus and its positivist mechanistic and utilitarian approach This leads to a form of technical liberalism advocating a market without society in which individuals are reduced to property rights and data subject to commercial transaction This book argues for a reconceptualisation of the philosophical foundations of economic reality in the 21st century Drawing on the continental tradition the book shows that adopting and combining anthropological ethical and metaphysical approaches can provide the basis for a better integration of markets so that they work with rather than against individual and social needs To correctly interpret the market as an institution and the firm as a social organisation the book explores concepts from the philosophy of action to show that it is people who literally create economic reality by providing for their needs through their creativity The book also explores the ethics that structure human behaviour providing a comparison between utilitarian ethics hedonistic

ethics and first person ethics or virtues This discussion provides a philosophical foundation for human action grounded in metaphysics The metaphysical approach helps to overcome the modernist reductionism of the human to a life of individual purpose and instead look towards a larger goal the common good This book marks a significant addition to the literature on the philosophy of economics ethics and markets institutions and economic theory more broadly *The Cumulative Book Index* ,1909 A world list of books in the English language
