Gessner, T.G. Blenkinsop, P. Sorjonen-Ward, 2018-08-07 Economically viable concentrations of mineral resources are uncommon in Earth's crust Most ore deposits that were mined in the past or are currently being extracted were found at or near Earth's surface often serendipitously To meet the future demand for mineral resources exploration success hinges on identifying targets at depth Achieving this requires accurate and informed models of the Earth's crust that are consistent with all available geological geochemical and geophysical information paired with an understanding of how ore forming systems relate to Earth's evolving structure Contributions to this volume address the future resources challenge

by i applying advanced microscale geochemical detection and characterization methods ii introducing more rigorous 3D Earth models iii exploring critical behaviour and coupled processes iv evaluating the role of geodynamic and tectonic setting and v applying 3D structural models to characterize specific ore forming systems      Geochemical and Geological Reconnaissance in the Seventymile River Area, Alaska Cornelia Clermont Cameron, Richard Philip Fischer, Sandra H. B. Clark, Ted G. Theodore, Helen Laura Foster, Jane P. Ohl, Ralph Jackson Roberts, 1970 The use of physical characteristics of peat and geologic settings of the deposits as guides to peat resources      Geological Survey Bulletin , 1949      *Engineering Approaches to Study Cardiovascular Physiology: Modeling, Estimation, and Signal Processing* Riccardo Barbieri, Zhe Chen, With cardiovascular diseases being one of the main causes of death in the world quantitative modeling assessment and monitoring of the cardiovascular control system plays a critical role in bringing important breakthroughs to cardiovascular care Quantification of cardiovascular physiology and its control dynamics from physiological recordings and by use of mathematical models and algorithms has been proved to be of important value in understanding the causes of cardiovascular diseases and assisting the prognostic or diagnostic process Nowadays development of new recording technologies e g electrophysiology imaging ultrasound etc has enabled us to improve and expand acquisition of a wide spectrum of physiological measures related to cardiovascular control An emerging challenge is to process and interpret such increasing amount of information by using state of the art approaches in systems modeling estimation and control and signal processing which would lead to further insightful scientific findings In particular multi disciplinary engineering empowered approaches of studying cardiovascular systems would greatly deepen our understanding of cardiovascular functions e g heart rate variability baroreflex sensitivity and autonomic control as it would also improve the knowledge about heart pathology cardiovascular rehabilitation and therapy Meanwhile developing cardiovascular biomedical devices or heart machine interface for either clinical monitoring or rehabilitation purpose is of greater and greater interest for both scientific advancement and potential medical benefits This Research Topic will bring together established experts whose areas of research cover a wide range of studies and applications Contributions include but are not limited to state of the art modeling methodologies algorithmic development in signal processing and estimation as well as applications in cardiovascular rehabilitation and clinical monitoring The Research Topic will consider both invited reviews and original research

Hokken, J. den Biggelaar, 2013-10-22 Computers are more and more becoming creative tools in music as well as in the visual arts and design In the last few years it has become clear that digital technology provides a platform for multimedia productions as well as a medium for new art forms Computer Music and Computer Graphics Animation have their own international forums The need was felt however to bring together the diverse disciplines within art and technology in one international event the First International Symposium on Electronic Art FISEA The Symposium attracted considerable

interest and hundreds of papers and proposals were submitted of which a selection were accepted This book also published as a supplement to the journal Leonardo publishes 20 of these selected papers under the editorship of Wim van der Plas Ton Hokken and Johan den Biggelaar This richly illustrated issue on Electronic Art reflects the enormous international interest which FISEA generated and will further stimulate interest in applications of new technology in music visual arts and design

**Giant Metallic Deposits** Peter Laznicka, 2010-09-02 Metals in the earth's crust are very unevenly distributed and traditionally a small number of ore deposits districts or countries have dominated the world supply and have influenced commodity prices The importance of exceptionally large or rich deposits has greatly increased in the age of globalization when a small number of international corporations dominate the metals market based on few very large ore deposits practically anywhere in the world Search for giant orebodies thus drives the exploration industry not only the in house teams of large internationals but also hundreds of junior companies hoping to sell their significant discoveries to the big boys Geological characteristics of giant metallic deposits and their setting and the politico economic constraints of access to and exploitation in prospective areas have been a hot topic in the past fifteen years but the knowledge generated and published has been one sided scattered and fragmented This is the first comprehensive book on the subject that provides body of solid facts rather than rapidly changing theories written by author of the Empirical Metallogeny book series and founder of the Data Metallogenica visual knowledge system on mineral deposits of the world who has had an almost 40 years long international academic and industrial experience The book will provide abundant material for comparative research in metallogeny practical information for the explorationists as to where to look for the elephants and some inspiration for commodity investors
