Lemov,2015-03-19 Car Safety Wars is a gripping history of the hundred year struggle to improve the safety of American automobiles and save lives on the highways Described as the equivalent of war by the Supreme Court the battle involved the automobile industry unsung and long forgotten safety heroes at least six US Presidents a reluctant Congress new auto technologies and most of all the mindset of the American public would they demand and be willing to pay for safer cars The Car Safety Wars were at first won by consumers and safety advocates The major victory was the enactment in 1966 of a ground breaking federal safety law The safety act was pushed through Congress over the bitter objections of car

manufacturers by a major scandal involving General Motors its private detectives Ralph Nader and a gutty cigar chomping old politician The act is a success story for government safety regulation It has cut highway death and injury rates by over seventy percent in the years since its enactment saving more than two million lives and billions of taxpayer dollars But the car safety wars have never ended GM has recently been charged with covering up deadly defects resulting in multiple ignition switch shut offs Toyota has been fined for not reporting fatal unintended acceleration in many models Honda and other companies have for years sold cars incorporating defective air bags These current events suggesting a failure of safety regulation may serve to warn us that safety laws and agencies created with good intentions can be corrupted and strangled over time This book suggests ways to avoid this result but shows that safer cars and highways are a hard road to travel We are only part of the way home

**High Noon in the Automotive Industry** Helmut Becker, 2006-02-10 This book was born from curiosity To begin with it was the curiosity of an economist who studied in the 60 s in an environment which has subsequently developed from national into global economics Who has to recognize that politicians scholars and large segments of society oblivious to supranational authorities and economic globalization forces continue to labour under the notion that they are still fully autonomous and sovereign when shaping national economic policy And pretend as though their own national state were still the master in its own house that despite unbridled market economics could continue to dictate to the economy and companies how to live and in which rooms All that has become fiction The laws of globalization diminish the manoeuvring space for shaping national economic policy Even if many folks today don't want to hear it The issue is no longer achieving what is socially politically desirable for the own society but rather the optimal adaptation of society and social benefits to the politically practicable
