Great Britain: National Audit Office,2010-11-12 The Department for Education has made good progress in improving take up and achievement in areas such as A Level maths and GCSE Triple Science However there has been less success in increasing the number of science teachers improving take up of A Level physics and raising the standards of school science facilities There is evidence that pupils taking Triple Science GCSE are more likely than those studying combined science to choose science subjects at A Level and to achieve higher grades While starting from a low base pupil take up of the three individual sciences has increased by almost 150 per cent in the last five years However by June 2009 almost half of secondary schools still did not offer Triple Science Take up of chemistry and maths A Level has already exceeded the targets for 2014 set by the Department but take up of physics A Level has increased only slightly since 2005 06 Achievement increased across all science subjects and maths at A Level between 2002 03 and 2009 10 Until recently the Department had a target to ensure that all school laboratories were up to a good or excellent standard by 2010 However it did not collect routine data to measure progress against this target and the most recent research available found that science facilities were inadequate in around a quarter of secondary schools Although recruitment of science graduates to train as specialist teachers has increased the Department is not on course to meet the targets set by the previous Government for recruiting more mathematics and physics teachers by 2014 **The Transformation of Title IX** R. Shep Melnick,2018-03-06 One civil

rights era law has reshaped American society and contributed to the country s ongoing culture wars Few laws have had such far reaching impact as Title IX of the Education Amendments of 1972 Intended to give girls and women greater access to sports programs and other courses of study in schools and colleges the law has since been used by judges and agencies to expand a wide range of antidiscrimination policies most recently the Obama administration s 2016 mandates on sexual harassment and transgender rights In this comprehensive review of how Title IX has been implemented Boston College political science professor R Shep Melnick analyzes how interpretations of equal educational opportunity have changed over the years In terms accessible to non lawyers Melnick examines how Title IX has become a central part of legal and political campaigns to correct gender stereotypes not only in academic settings but in society at large Title IX thus has become a major factor in America s culture wars and almost certainly will remain so for years to come Gay on God's Campus

Jonathan S. Coley,2018-02-02 Although the LGBT movement has made rapid gains in the United States LGBT people continue to face discrimination in faith communities In this book sociologist Jonathan S Coley documents why and how student activists mobilize for greater inclusion at Christian colleges and universities Drawing on interviews with student activists at a range of Christian institutions of higher learning Coley shows that students initially drawn to activism because of their own

political religious or LGBT identities are forming direct action groups that transform university policies educational groups that open up campus dialogue and solidarity groups that facilitate their members personal growth He also shows how these LGBT activists apply their skills and values after graduation in subsequent political campaigns careers and family lives potentially serving as change agents in their faith communities for years to come Coley s findings shed light on a new frontier of LGBT activism and challenge prevailing wisdom about the characteristics of activists the purpose of activist groups and ultimately the nature of activism itself For more information about this project s research methodology and theoretical grounding please visit <http://jonathancoley.com> book **Research on College Stress and Coping** Christopher J.

McCarthy,R. Jason Lynch,Stephen DiDonato,2024-09-01 This volume informs our understanding of how college settings can respond to the challenges of the COVID 19 pandemic and beyond The college years are often a stressful time for students but the pandemic has added unprecedented levels of demands Much of what we know about stress and trauma in education predates the COVID 19 pandemic Readers of this book will better understand the demands of the pandemic as well as the resources college will need going forward As the pandemic recedes it seems likely that promoting student health always a challenge will become even more difficult Students faced steep losses in their academic and socio emotional progress after more than two years of pandemic impacted schooling The silver lining is that scholars who study the occupational health have spent the past several years studying the effect of the pandemic on college students which led us to edit this volume to collect what is known and have these experts explain how we can better support students in the future **AI-Guided**
