The role of libraries in supporting academic integrity is not always clear and has not been fully explored. Drawing from library literature and that of academic integrity more broadly, readers are exposed to how libraries are necessary in a holistic approach to academic integrity. Education about academic integrity and the prevention of academic misconduct for not only students but other institutional stakeholders are demonstrated as occurring optimally in positive, supportive, and proactive ways. The book details numerous ways in which librarians can work with faculty and other stakeholders using established frameworks such as information literacy and blended librarianship as well as innovative platforms and content. Other contributions involve the identification of potential academic misconduct and administration of academic integrity policies to complete the cycle recommended by the frameworks of global educational quality organizations QAA, TEQSA. Initiatives presented in the book include those at the course level and institution-wide initiatives involving curriculum policy and supports for faculty and students. Also contained are efforts occurring at a national level within professional networks in addition to international library curriculum. This book provides inspiration to institutions and academic libraries of any size and scope to embrace this emerging role in creating cultures of academic integrity.

Handbook of Research on Coping Mechanisms for First-Year Students Transitioning to Higher Education Aloka, Peter, Mukuna, Kananga Robert, 2023-02-20

Transitioning from secondary to higher education is not a natural step for many first-year students in higher education institutions. There is a considerable difference between being a student at school and university, and previous research has highlighted the difficulties faced by first-year university students during their transition phase. Higher education institutions and their departments acknowledge the challenges faced by new students and they differ in their approach to coping with the issue; each seeks to find the most effective solution for its students. To reduce the withdrawal rate during the first year of college, higher education providers are expected to apply transition programs to help students transition. The Handbook of Research on Coping Mechanisms for First-Year Students Transitioning to Higher Education presents a comprehensive account of the dynamics in higher education institutions and culture shock for new students and analyzes models and theories of adjustment of new students in higher education institutions. Covering key topics such as gender, institutional support, and success factors, this reference work is ideal for administrators, higher education professionals, researchers, scholars, academicians, practitioners, instructors, and students.
