Chajes,2008 Featuring a biography and publications list of Arnold D Kerr this work includes papers on various topics including contact mechanics nondestructive evaluation of structures ice mechanics stability of structures engineering of railway tracks and concrete pavements sandwich structures biomechanics and biomaterials and applied mathematics A Different Kind of Black and White Prue Bramwell-Davis,2016-03-08 Why should we continue to draw by hand when computers and photography can do it for us Freehand drawing is currently enjoying a widespread renaissance In this path breaking study the act of drawing is explored as a way to foster epistemic development and wise thinking skills Drawing exposes the connecting processes of perception by which we make sense of the world creating and using systems of classification which ultimately create boundaries By exploring the relationships between metaphor the mental activity fundamental to language and the coordination of hand and eye essential for drawing such categories can be dissolved through the development of visual intelligence This book discusses approaches to epistemic development in relation to experiential learning citing students descriptions of their encounters with ways of knowing based on value judgments rather than the perceived safety of facts Chapters on prehistoric cave art and early medieval practices of the art of memory provide further insights into what it means to draw and what a drawing is A chapter on the history of engineering education discusses the narrowing effects of abstract and theoretical approaches to knowledge at the expense of practical skill and experience The study was developed in the setting of a postgraduate industrial design course for engineers at the Royal College of Art London but its concerns and recommendations including a wealth of teaching ideas apply

wherever professional practitioners have to make judgments involving conflicting ideas Its insights hint at a deeper role for the university taking postgraduates beyond the narrow instrumentalist training agendas favoured by current government policies to a larger vision of the meaning of professional development

Academe has made little progress in hiring and advancing faculty of color Through the narratives of full professors of color this book aims to make visible their journeys beset with lack of criteria transparency marginalization discouragement and discrimination on the way to success to provide insights for junior and mid level scholars as they negotiate their pathways to full professorship This book offers readers a unique micro and macroscopic window into the lived experiences of individuals who represent a multitude of social ethnic and cultural identities disciplinary domains academic and professional credentials and socialization experiences They share their doubts and fears as they began their applications the contradictory advice they received who they consulted for guidance some of the indelible costs of the experience and when they encountered it how they dealt with initial rejection In describing their persistence and success the contributors reflect on the rewards of the position and the opportunities it offers to play influential decision making roles and become agents of change shifting institutional culture values and practices Beyond filling a gap in the literature and research on and promotion to this position this book uniquely addresses the experiences of women and men faculty of color raising broad implications for how higher education recruits evaluates and rewards faculty work as well as the broader context of racial and social institutional goals and outcomes This book is intended for several audiences First for faculty of color who aspire to the rank of full professor Second for faculty in general including allies who work tirelessly for social justice to dismantle white supremacy racism sexism and the range of discriminatory practices Third for administrators in senior leadership positions to make them aware of the inequitable path to full professorship and the gross underrepresentation of faculty of color at that rank whose experiences and expertise are now more than ever needed as student demographics are changing
