Acids

The Sour Taste

Substances that have a sour taste are called acids. Acids can be very harmful to the body. Some acids can be harmful to the body.

There are many different acids. One way to identify an acid is by its taste. Acids have a sour taste. However, since you cannot get around tasting things that are acids, there are other ways to identify an acid. These ways to identify an acid are called **properties of an acid**.

Properties of an Acid

Acids can be electrolytes. An electrolyte is a liquid or gel that is able to conduct electricity. Some acids contain these ions, which are called electrolytes. This means they can carry an electric charge.

Acids are corrosive to metals. Meaning they can eat away at metals. Hydrogen gas is produced.

Acids will change color when certain chemicals are added. These are called indicators. They indicate or tell whether an example of a substance is an acid or not. An example of an indicator is litmus paper. Litmus paper will turn red if it is an acid and blue if it is a base.

What Are Some Common Acids?

Sulfuric Acid This is one of the most widely used chemicals in the world. You may also know this as a battery acid. Sulfuric acid can also be used to produce fertilizer. Another use for sulfuric acid is it can be used as a cleaning agent. This is a substance that removes water from materials. It is usually found colorless but when exposed to light it slowly changes yellow. This acid can cause serious burns to human skin, it can also cause severe burns if it is inhaled.

Nitric Acid This is found as a colorless gas. Hydrochloric acid can be used to break down the bones of the greatest use to it is in our stomachs. Hydrochloric acid breaks down the food in our stomachs. If we did not have hydrochloric acid in our stomachs, then we would not be able to break down food for digestion which would eventually lead to death.

Carbonic Acid This weak acid is found in some drinks. Examples of some drinks are sodas, fruit juices, and lemonades. This acid can also be added to foods and drinks.
