Composing Teacher-Research Cathy Fleischer,1995-03-02 In *Composing Teacher Research* the author provides a much needed critical look at the teacher research movement by recounting her own experiences over the past decade. Informed by readings in a number of disciplines and by her own classroom practice Fleischer documents the shifts and changes she made as a teacher when she took on the additional role of researcher. The book presents four case studies of classrooms and students at both the high school and college level focusing on the ways students see their own literacy in and out of school. Fleischer not only reproduces these case studies as they were written at various points in her journey but provides commentary through pre and post scripts in which she points out particular issues of concern for those who practice classroom research: what it means to represent others' experiences, how we can create research which is at the same time ethical and pedagogically sound, how the stakes for being a teacher researcher have changed in a postmodern world.

Presenting examples of school librarians leading professional learning in numerous contexts and for diverse learning goals with remarkable success, this book will inspire other practitioners to initiate and refine professional learning in their schools and districts. School administrators are recognizing that school librarians are ideal to lead professional development because they service the entire school network from the students and faculty to families and the community. As a national downturn in educational funding is diminishing districts' ability to optimally staff libraries, investing energy in professional development is a sound strategy to bring information literacy skills to every student, especially in buildings with part-time librarians or districts with only a single librarian of record. *Growing Schools: Librarians as Professional Developers* stands apart from other works as the first book that directly addresses the potential role of the school librarian as a staff developer. Within the chapters, the authors relate their professional development journeys, collectively representing experience within K-12 public and private institutions, district and regional units, and universities across the United States and Canada. The work provides various approaches to professional development with a range of processes and techniques that have been proven effective in different contexts and in achieving diverse learning goals. Practitioners at the building and district levels, as well as school principals, state and district personnel, and library educators will find this book insightful and instructive.
