

Interpreting a Human Pedigree

Use the pedigree below to answer 1-5

1. In a pedigree, a square represents a male. If it is *darkened* he has *hemophilia*; if clear, he had normal blood clotting.

- How many males are there? **8**
- How many males have hemophilia? **3**

However, if the line is connected to another horizontal line, then several children were produced, each indicated by a short vertical line connected to the horizontal line. The first child born appears to the left and the last born to the right.

- How many children did the first couple (couple in row I) have? **2**
- How many children did the third couple (couple in row II) have? **7**

5. Level I represent the first generation, level II represents the second generation.
