This was discovered by French and Italian archaeologists. However, modern-day pizza evolved from an Italian flatbread dish in the early 18th or 19th century.

Modern Day Pizza

Pizza has progressed to the "pizza" it's known as today with the introduction of the tomato. The tomato was introduced to Europe by the Americans in the 16th century. As a result, the modern pizza was born. The pizza dish would eventually gain astounding popularity. It gained so much popularity that tourists would travel to Naples, Italy just to try it. While the pizza was still known as a poor person's dish, it began to appear in restaurants. This was the start of pizzerias.

Over 120 pizzerias had opened in Naples by the late 19th century. Even today, there are famous pizzerias still standing there. They are considered to be an imperative part of the story of Naples and of pizza. The spread of the pizza dish to the rest of Italy happened through immigration. During the 19th century, many Italian immigrants brought their own recipes with them to America.

New York and Chicago were popular destination spots for Italian immigrants. This also happens to be where the first pizzerias in America can be found. One of the first pizzerias to open in America was in 1905. A man named Lombardi applied for a license to sell pizza and was approved. Lombardi's Pizzeria is still popular and well-known in New York.
