BSC-DEA Model with Indeterminate Information Mohammad Jaber Hafshjani,Seyyed Esmaeil Najafi,Farhad Hosseinzadeh
Lotfi,Seyyed Mohammad Hajimolana, Strategy is the main source of long term growth for organizations and if it is not
successfully implemented even if appropriate ones are adopted the process is futile The balanced scorecard which focuses on
four aspects such as growth and learning internal processes customer and financial is considered as a comprehensive
framework for assessing performance and the progress of the strategy Moreover the data envelopment analysis is one of the

best mathematical methods to compute the efficiency of organizations The combination of these two techniques is a significant quantitative measurement with respect to the organization s performance However in the real world determinate and indeterminate information exists Henceforth the indeterminate issues are inescapable and must be considered in the performance evaluation Neutrosophic number is a helpful tool for dealing with information that is indeterminate and incomplete **The Publisher** ,1902 **The Publishers' Trade List Annual** ,1875 *The Athenaeum* ,1874
