The Nature and Role of Algebra in the K-14 Curriculum Center for Science, Mathematics, and Engineering Education, National Council of Teachers of Mathematics and Mathematical Sciences Education Board, National Research Council, 1998-10-07 With the 1989 release of *Everybody Counts* by the Mathematical Sciences Education Board MSEB of the National Research Council and the Curriculum and Evaluation Standards for School Mathematics by the National Council of Teachers of Mathematics NCTM the standards movement in K 12 education was launched Since that time the MSEB and the NCTM have remained committed to deepening the public debate discourse and understanding of the principles and implications of standards based reform One of the main tenets in the NCTM Standards is commitment to providing high quality mathematical experiences to all students Another feature of the Standards is emphasis on development of specific mathematical topics across the grades In particular

the Standards emphasize the importance of algebraic thinking as an essential strand in the elementary school curriculum. Issues related to school algebra are pivotal in many ways. Traditionally algebra in high school or earlier has been considered a gatekeeper critical to participation in postsecondary education especially for minority students. Yet as traditionally taught first year algebra courses have been characterized as an unmitigated disaster for most students. There have been many shifts in the algebra curriculum in schools within recent years. Some of these have been successful first steps in increasing enrollment in algebra and in broadening the scope of the algebra curriculum. Others have compounded existing problems. Algebra is not yet conceived of as a K 14 subject. Issues of opportunity and equity persist. Because there is no one answer to the dilemma of how to deal with algebra making progress requires sustained dialogue experimentation reflection and communication of ideas and practices at both the local and national levels. As an initial step in moving from national level dialogue and speculations to concerted local and state level work on the role of algebra in the curriculum the MSEB and the NCTM co sponsored a national symposium The Nature and Role of Algebra in the K 14 Curriculum on May 27 and 28 1997 at the National Academy of Sciences in Washington D C.
