Topic A1 Culture and Identity

Outline and explain two ways in which globalisation has influenced the sense of self in contemporary society. (10 marks)

Globalisation is the process of increasing interconnectedness and interdependence among people, businesses, and countries around the world. It has influenced the sense of self in contemporary society in various ways, including:

Globalisation has facilitated the spread of cultural values and norms across the world, leading to the emergence of a global culture that incorporates elements from different cultures. As a result, people are exposed to different cultural practices, beliefs, and values, and they are more likely to adopt and incorporate them into their own sense of self. This has led to the emergence of a hybrid identity, which is a combination of different cultural identities. For instance, people in Western societies may adopt Eastern practices like meditation or yoga, and people in non-Western societies may adopt Western fashion or music.

Globalisation has also contributed to the rise of cosmopolitanism, which is the idea that individuals belong to a global community rather than just a local or national one. Cosmopolitanism reflects a sense of belonging to a broader community, and it is often associated with a willingness to embrace diversity and to respect other cultures and ways of life. As a result, people may be more likely to view themselves as citizens of the world rather than just members of their own community or country. This can lead to a shift in their sense of identity from a local or national one to a global one.

In conclusion, globalisation has had a significant impact on the sense of self in contemporary society, with the emergence of a hybrid identity and the rise of cosmopolitanism. These changes reflect a growing recognition of the interconnectedness of the world and the need to embrace diversity and respect for different cultures and ways of life.
