This book explores the participation of this new category of actors in an international legal system that has historically been dominated by states. It explores the most important issues actors and theoretical approaches with respect to these new participants in international law. It provides the reader with a comprehensive and state of the art overview of the most important legal and political developments and perspectives. Relevant non state actors discussed in this volume include in particular international governmental organisations, international non governmental organisations, multinational companies, investors and armed opposition groups. Their legal position is considered in relation to specific issue areas such as humanitarian law, human rights, the use of force and international responsibility. The main legal theories on non state actors' position in international law, neo positivism, the policy oriented approach and transnational law are covered at the beginning of the book, and the essential political science perspectives on non state actors' role in international politics and globalisation as well as their soft power are presented at the end.

**Post-Cold War Anglo-American Military Intervention** James Fiddes, 2019-10-17 Exploring case studies from the first Gulf War to the Syria crisis, this book discusses different approaches to the use of international law and the role it plays in international power politics. Analysis of the post Cold War overseas military involvements of Western powers has focused on their legality and legitimacy, allowing for a conflation of the concepts and distracting from the true source of international legitimacy. Demonstrating compliance with international law can be helpful, but it plays a secondary role to other more powerful considerations such as national interest and shared national security concerns. Exploring the key drivers for decision makers, this book identifies the impact of previous experience on the use of international law in the quest for legitimacy ahead of launching military action. Patterns in approach and of relations between close Western allies, in particular the UK and US, are identified, offering valuable lessons for future strategic decision making. This book will appeal to scholars and students of International Relations and International Law. Think Tanks focussing on International Relations and the use of force and practitioners working in the realm of foreign policy with a focus on the UN and international law will also be interested in the study and conclusions drawn.

**China's Unequal Treaties** Dong Wang, 2005-10-01 This study, based on primary sources, deals with the linguistic development and polemical uses of the expression Unequal Treaties, which refers to the treaties China signed between 1842 and 1946. Although this expression has occupied a central position in both Chinese collective memory and Chinese and English historiographies, this is the first book to offer an in depth examination of China's encounters with the outside world as manifested in the rhetoric surrounding the Unequal Treaties. Author Dong Wang argues that competing forces within China have narrated and renarrated the history of the treaties in an effort to consolidate national unity, international independence and political legitimacy and authority. In the twentieth century, she shows, China's experience with these treaties helped to determine their use of international law. Of great relevance for students of contemporary China and Chinese history as well as Chinese international law and politics, this book illuminates how various Chinese political actors have defined and redefined the past using the framework of the

Unequal Treaties      Power in the Global Era T. Cohn, S. McBride, J. Wiseman, 2000-09-08 This volume discusses the effects of globalization on changing power relationships between transnational corporations TNCs and transnational capital the state and subnational groups TNCs have expanded their power with the deepening of market relations but they are not causing the state to wither away Indeed neoliberal changes often occur with the permission or even encouragement of powerful states Transnational capital has weakened labour groups in order to make production more competitive but the disadvantaged groups may mobilise to counter the power of transnational capital Finally globalization is subjecting domestic policies to increased international scrutiny      **Apocalyptic Crimes** Ronald C. Kramer, 2025 Ronald C Kramer applies theories from criminology to argue that possession of nuclear weapons is a criminal act and shows how a nuclear apocalypse might be averted offering a pathway to the abolition of these devastating weapons      Innovations in Environmental Legislation and Justice: Environmental and Water-Energy-Food Nexus Laws Norouzi, Nima, Movahedian, Hussein, 2023-04-12 Human health has been protected from environmental contamination by national laws throughout history but there are still many areas of international environmental law that are underdeveloped Even though numerous international environmental treaties have been established effective agreements remain difficult to achieve for a variety of reasons Because environmental problems disregard political boundaries they can only be adequately addressed by a wide range of governments some of which may have serious disagreements on important points of policy The knowledge gap between legal developments designed to achieve environmental objectives and the practical scientific and technical applications must be bridged Environmental and energy law should be explored from a wide range of perspectives and approaches to gain insight into how the law is designed to tackle particular environmental problems Innovations in Environmental Legislation and Justice Environmental and Water Energy Food Nexus Laws examines the development and application of international environmental laws and regulations dealing with global air water and land pollution By adopting a multi disciplinary approach to environmental and energy law the book embraces all readerships and goes a step further to address the often thorny problem of improving communication between scientists and engineers and law and policymakers Covering topics such as environmental justice green constitutions and climate change this book is ideal for policymakers government officials legal professionals environmentalists students academicians researchers and more      Ecological Vulnerability Katie Woolaston, 2022-06-23 This book offers novel theoretical responses to the question of how laws and institutions shape the human wildlife relationship

[The Leasing of Guantanamo Bay](#) Michael J. Strauss,2009-05-14 Post 2002 events at the U S naval facility at Guantanamo Bay have generated a spate of books on its use as a detention center in the U S fight against terrorism Yet the crucial enabling factor the lease that gave the U S control over the territory in Cuba has till now escaped any but cursory consideration The Leasing of Guantanamo Bay explains just how Guantanamo Bay came to be a leased territory where the U S has no sovereignty and Cuba has no jurisdiction This is the first definitive account of the details and workings of the unusual and problematic state to state leasing arrangement that is the essential but murky foundation for all the ongoing controversies about Guantanamo Bay s role in U S anti terrorism efforts charges of U S human

rights violations and U S Cuban relations The Leasing of Guantanamo Bay provides an overview of territorial leasing between states and shows how it challenges compromises and complicates established notions of sovereignty and jurisdiction Strauss unfolds the history of the Guantanamo Bay recounting how the U S has deviated widely from the original terms of the lease yet never been legally challenged by Cuba owing to the strong state weak state dynamics The lease is a hodge podge of three U S Cuba agreements full of discrepancies and uncorrected errors Cuba s failure to cash the annual rent checks of the U S has legal implications not only for the future of Guantanamo Bay but of the Westphalian system of states Compiled for the first time in one place are the verbatim texts of all the key documents relevant to the Guantanamo Bay lease including treaties and other agreements a previously unpublished U N legal assessment and once classified government correspondence
