Przelecki,Ryszard Wójcicki,2012-12-06 The anthology presents a selection of methodological writings published by Polish logicians after World War 11 the first of them dated 1947 All the papers belong to what may be called Logical Methodology or Logical Theory of Science The epithet logical characterizes rather the general point of view than the particular methods employed by the authors Apart from articles which make an essential use of different formal logical and mathematical methods there are many which do not involve any formal apparatus whatsoever The problems the papers deal with may be characterized as problems of the general methodology of empirical science The papers do not consider the methodological problems of formal mathematical knowledge and as a rule they are concerned with empirical science as a whole and not with some of its specific branches The topics covered by the selected writings include the main issues and controversies discussed within the contemporary methodology of science A considerable part of the anthology is concerned with the semantics of empirical languages and considers problems such as interpretation of observational and theoretical terms analyticity empirical meaningfulness etc Another group of papers deals with the problem of induction and examines various ways of its justification Some articles discuss the nature and the status of methodology itself The materials have been selected so as to make up a whole representative of what has been done in this field in Poland since 1945 The book comprises 33 articles by 20 authors **Actes du XIVe Congrès international de philosophie, Vienne du 2 au 9 septembre 1968** Leo

Stewart,2017-05-15 This volume explores in detail Kierkegaard s various relations to his German contemporaries Kierkegaard read German fluently and made extensive use of the writings of German speaking authors Apart from his contemporary Danish sources the German sources were probably the most important in the development of his thought generally This volume represents source work research dedicated to tracing Kierkegaard s readings and use of the various

German speaking authors in the different fields in a way that is as clearly documented as possible The volume has been divided into three tomes reflecting Kierkegaard's main areas of interest with regard to the German speaking sources namely philosophy theology and a more loosely conceived category which has here been designated literature and aesthetics This first tome treats the German philosophical influences on Kierkegaard The dependence of Danish philosophy on German philosophy is beyond question In a book review in his Hegelian journal *Perseus* the poet playwright and critic Johan Ludvig Heiberg laments the sad state of philosophy in Denmark while lauding German speculative philosophy Moreover Kierkegaard's lifelong enemy the theologian Hans Lassen Martensen claims without exaggeration that the Danish systems of philosophy can be regarded as the disjecta membra of earlier German systems All of the major German idealist philosophers made an impact in Denmark Kant Fichte Schelling and most significantly Hegel Kierkegaard was widely read in the German philosophical literature which he made use of in countless ways throughout his authorship

**Hegel and the History of Philosophy** J.J. O'Malley, K.W. Algozin, F.G. Weiss, 2012-12-06

The papers published here were given at the second biennial conference of the Hegel Society of America held at the University of Notre Dame November 9-11 1972 They appear in an order which reflects roughly two headings 1 Hegel's conception of the history of philosophy in general and 2 his relation to individual thinkers both before and after him Given the importance of the history of philosophy for Hegel and the far reaching impact of his thought upon subsequent philosophy it becomes immediately apparent that we have here only a beginning At the conference cries went up Why not Hegel and Aristotle Aquinas Husserl and Hartmann Indeed why not The answer of course might be given by Hegel himself if we wish to accomplish anything we have to limit ourselves We trust that future conferences and scholarship will bring to light these relationships and the many more which testify to Hegel's profound presence in the mainstream of past and present thought It is furthermore no accident that the renaissance of Hegelian studies has brought with it a rebirth of the history of philosophy as something relevant to our own problems For Hegel the object of philosophy is alone the truth the history of philosophy is philosophy itself and this truth which it gives us cannot be what has passed away
