The Alcatel-Lucent lightRadio™ 9361 Home Cell Askey V3 B1 20mW (lightRadio 9361 HC) is a low-power, high-capacity wireless device that cost-effectively extends Wideband Code Division Multiple Access (W-CDMA) and High-Speed Packet Access+ (HSPA+) coverage and capacity to the home, delivering fast, responsive data service and crystal-clear voice.

Back view

The end user simply connects the lightRadio 9361 HC to power and a broadband Internet service, and the lightRadio 9361 HC automatically comes into service without any additional user intervention.

The lightRadio 9361 HC increases the uptake of 3G services, generating additional revenue from services mobile service providers (MSPs) already offer. It also provides application programming interfaces (APIs) that enable MSPs to leverage unique network capabilities, such as location and presence, to develop new, innovative applications.

The lightRadio 9361 HC uses a flat IP architecture and secured access through an existing broadband Internet connection to offload voice and data traffic from a macro network, substantially reducing capital expenditures (CAPEX) and operating expenditures (OPEX). True plug-and-play capabilities and Bell Labs Self-optimizing Network (SON) technology enable zero-touch configuration and self-optimization to deliver outstanding performance.

This product improves end-user quality of experience (QoE) through a higher quality air interface that provides crystal-clear voice, faster and more reliable data connections and higher data throughput.

The lightRadio 9361 HC is part of the carrier-grade, end-to-end Alcatel-Lucent 9360 Small Cells solution that easily integrates into any MSP's existing 3G network.
