Federal Energy Regulatory Commission, **Partnerships for Global Ecosystem Management** Ismail Serageldin,Joan Martin-Brown,1999 The theme for the fifth annual Environmentally and Socially Sustainable Development Conference was the scientific legal and economic requirements of global ecosystem management This volume presents readings and examines the outcomes from this conference The objectives were to engage external experts and Bank managers and staff to provide a unique opportunity for major professional groups to interact on the requirements to link scientific economic and legal solutions for global ecosystem management at the country level and to promote understanding as to how best practice and innovations can be used for shared ecosystem management in sustainable development planning A Treatise on the Law of Instructions to Juries in Civil and Criminal Cases Henry Edward Randall,1922 *Military Professionalism and Humanitarian Law* Yishai Beer,2018-04-09 This book challenges the unacceptable gap between the positive rules of the international law governing armed hostilities and actual state practice It discusses reducing the human suffering caused by this reality The current law does not seem to be optimal in balancing the different interests of states militaries and the humanitarian agenda In response to this challenge this book offers a new paradigm based on reality that may elevate the humanitarian threshold by replacing the currently problematic imperatives imposed upon militaries with professionally based therefore attainable requirements The aims of the suggested paradigm are to create an environment in which full abidance by the law becomes a realistic norm thus facilitating a second more important aim of reducing human suffering Militaries function in a professional manner they develop and respect their doctrine operational principles fighting techniques and values Their performances are not random or incidental The suggested paradigm calls for leveraging the constraining elements that are latent in military professionalism Talking professional language and adopting the professional way of thinking that underlies militaries conduct makes it possible to identify and focus upon the core interests of a military in any given lawful war those that ought to be taken into consideration alongside those that can be sacrificed for the sake of the

humanitarian concerns while still allowing the military mission to be achieved Indeed leveraging professional standards and norms would establish a reasonable modus vivendi for a military while allowing substantial new space for the humanitarian mission of the law **Haynes GM N-Cars Owners Workshop Manual, No. 1420** Bob Henderson,J.
