It also focused on the design of tools to execute and analyze biological models in ways that can significantly advance our understanding of biological systems As a forum for this discussion we invited key scientists in the area of formal methods to this unique meeting Although this was a one off meeting we are exploring the possibility of this forming the first of what might become an annual conference Presentations at the meeting were by invitation only future meetings are expected to operate on a submission and review basis The Steering Committee and additional referees reviewed the invited papers Each submission was evaluated by at least two referees The volume includes nine invited contributions Formal Methods in Systems Biology 2008 was made possible by the contribution and dedication of many people First of all we would like to thank all the authors who submitted papers Secondly we would like to thank our additional invited speakers and participants We would also like to thank the members of the Steering Committee for their valuable comments Finally we acknowledge the help of the administrative and technical staff at the Microsoft Research Cambridge lab *Unity 3D Game Development by Example* Ryan
