to date From Sheikhs to Sultanism Christopher M. Davidson, 2022-01-15 Muhammad bin Salman Al Saud and Muhammad bin Zayed Al Nahyan the respective princely strongmen of Saudi Arabia and the UAE have torn up the old rules They have spurred game changing economic master plans presided over vast anti corruption crackdowns tackled entrenched religious forces and overseen the mass arrest of critics In parallel they also appear to have replaced the old sheikhly consensus systems of their predecessors with something more autocratic more personalistic and perhaps even analytically distinct These are the two wealthiest and most populous Gulf monarchies and increasingly important global powers Saudi Arabia is a G20 member and the UAE will be the host of the World Expo in 2021 2022 Such sweeping changes to their statecraft and authority structures could well end up having a direct impact for better or worse on policies economies and individual lives all around the world Christopher M Davidson tests the hypothesis that Saudi Arabia and the UAE are now effectively contemporary or even advanced sultanates and situates these influential states within an international model of autocratic authoritarianism Drawing on a range of primary sources including new interviews and surveys From Sheikhs to Sultanism puts forward an original empirically grounded interpretation of the rise of both MBS and MBZ **Revisionist Histories** Marnie Hughes-Warrington, 2013-07-18 Revision and revisionism are generally seen as standard parts of historical practice yet they are underexplored within the growing literature on historiography In this accessibly written volume Marnie Hughes Warrington discusses this paucity of work on revision in history theory and raises ethical questions about linear models and spatial metaphors that have been used to explain it *Revisionist Histories* emphasises the role of the authors and audiences of histories alike as the writers and rewriters of history Through study of digital environments graphic novels and reader annotated texts this book shows that the sides of history cannot be disentangled from one another and that they are subject to flux and even destruction over time Incorporating diverse and controversial case studies including the French Revolution Holocaust Denial and European settlers contact with Native Americans and Indigenous Australians *Revisionist Histories* offers both a detailed account of the development of revisionism and a new more spatial vision of historiography An essential text for students of historiography **Minerals Yearbook** ,2013 **Kenya Gazette** ,2011-10-14 The Kenya Gazette is an official publication of the government of the Republic of Kenya It contains notices of new legislation notices required to be published by law or policy as well as other announcements that are published for general public information It is published every week usually on Friday with occasional releases of special or supplementary editions within the week *Retroviruses, retroelements and their restrictions* Atsushi Koito, Yukihiro Ishizaka, 2015-05-01 Human retroviruses HIV and HTLV have been recognized as important pathogens because of their association with lethal diseases such as AIDS and ATL Considerable resources and efforts have been directed at understanding the interaction between these retroviruses and their host which may provide clues as to how the infection can be controlled or prevented Among the key scientific successes is the identification of intracellular restriction factors that have evolved as obstacles to the replication of pathogens including

infectious retroviruses The discovery of APOBEC which are strong mutagens of retroviral genomes and intracellular retroelements began a new era of intense research activities into the spectrum of intrinsic anti HIV activity leading to the identification of TRIM5a BST2 Tetherin and SAMHD1 In response HIV has evolved several accessory genes as weaponries to evade these intracellular restriction activities The intracellular antiretroviral defenses evolved in response to endogenous retroelements that make up more than 40% of the entire mammalian genome and which are regarded as ancestors of infectious retroviruses LTR type retroelements are present in all higher eukaryotes representing about 8% of the human genome Non LTR retroelements can be found at extremely high copy numbers also with a significant portion of mammalian genomes consisting of LINEs Mammalian genomes are modified by LINEs through insertions but also by the indirect replication of non autonomous retrotransposons such as SINEs LINEs insertion was shown to have played and continue to play important roles in genomic evolution and somatic genome mosaicism mediated physiology And because retrotransposition can confer genetic diversity that is beneficial to the host the vertebrate intrinsic immunity has evolved to support a balance between retroelement insertions that confer beneficial and those that cause deleterious gene disruptions The articles published in this Research Topic should serve not only as valuable references for the field but provide future topics of research for investigators that should further our understanding of the retrovirus retroelements and their restrictions

Peace in Turkey 2023 Tim Jacoby, Alpaslan Özerdem, 2013-01-01 *Peace in Turkey 2023 The Question of Human Security and Conflict Transformation* by Tim Jacoby and Alpaslan Özerdem explores how the Kurdish conflict could possibly be transformed towards positive peace By drawing on peace conflict transformation and human security theories *Peace in Turkey 2023* seeks to redress a long felt concern in Turkey how to address the current challenge of establishing sustainable peace in the country What will Turkey look like at its Republic's centenary celebrations in 2023 Will it be able to resolve the Kurdish crisis through peaceful means and successfully transform the conflict towards positive peace Will it be a country of peace prosperity rule of law and democracy or will the current violence intensify and continue to polarize society To address these questions Jacoby and Özerdem use scenario writing derived from peace theory to highlight new ways to consider political violence and the future of Turkey this study will appeal to both specialist and non specialist students and teachers from a diverse range of disciplinary backgrounds

China's Quest for Great Power Bernard D Cole, 2016-09-15 This book examines China's national security strategy by looking at the three major elements foreign policy energy security and naval power all interactive and major influences on China's future and its relations with the United States A decade and a half into the twenty first century Beijing requires reliable access to energy resources the navy to defend that access and foreign policies to navigate safely toward its goals Most importantly the People's Liberation Army Navy PLAN must be able to safeguard China's regional maritime interests especially the sovereignty disputes involving Taiwan and the Yellow East China and South China Seas Many Chinese naval officers and analysts think the United States is determined to contain China and

prevent it from achieving the dominant historical position to which it is entitled This view has been strengthened by Washington's shift to Asia transfer of naval units to the Pacific and the March 2015 Maritime Strategy released by the U S Navy Marine Corps and Coast Guard China's relationship with the United States is vital to both countries and to the world The relationship is based on both common and divergent interests in economics military operations and political goals and methods China's international trading economy and ambition for a world class navy require effective foreign diplomacy and participation in global affairs This policy trifecta in large part defines China's posture to the world Beijing is approximately halfway toward its mid century goal of deploying a navy capable of defending China's perceived maritime interests China's priorities follow President Xi Jinping's definition of national security as comprehensive encompassing politics the military the economy technology the environment and culture What this means for future Chinese foreign policy choices as naval modernization and energy security concerns enable different courses of action lies at the center of this book's conclusions
