Jacket **Surface Effects and Contact Mechanics including Tribology XII** J.Th.M. De Hossen, M. Hadfield, C.A. Brebbia, 2015-04-21 The book contains papers from the twelfth in a series of biennial conferences first held in 1993 on the topics of contact mechanics and surface effects and their interaction In general structural components fail by wear corrosion and fatigue that is to say affected and initiated by surface conditions Consequently it is often appropriate to modify the surface layer of a base material or coat it so as to provide an enhanced performance or longer life However in many cases it is the combined effect of wear and corrosion that is damaging contributing to complexity in determining the proper approach The surface treatment chosen should be suitably related to the problem to be solved The necessary thickness of the coating depends largely on the applied loading and environmental conditions The papers in the book address novel protective layers for advances in sliding wear and low friction The contents cover topics such as Experimental and Measurement Tests Surface Modification Surface Problems in Contact Mechanics Thick and Thin Coatings Tribomechanics Computer Simulation SSC.
