Orangutan

Orangutans live in **tropical** rainforests in Southeast Asia. It's very hot and rainy there. About 8 inches of rain can fall in one day! Orangutans are **arboreal** animals. There's lots of trees in the rainforest! Orangutans are built for life in the trees! They have long arms for swinging from tree to tree. Their arms are so long they almost touch the ground when they stand! Orangutans' hands and feet are shaped like hooks. This makes it easy to grab tree branches!

Orangutans spend about 4 hours a day eating! They like to eat flowers, leaves, and tree bark, but mostly they eat fruit. Orangutans count on their memory to find food. Orangutans are very smart and can remember where fruit trees are in the rainforest. Orangutans' sense of sight also comes in **handy** when finding a meal. They can see very well! Orangutans, however, are not super sniffers! Their sense of smell is not as helpful to them when it comes to finding food.

After a long day, orangutans are ready for a good night's sleep. Orangutans find a spot in a tree and build a nest. They gather leaves and branches for the nest. They even make a roof with big leaves to keep out the rain. Orangutans sleep for about 12 hours each night. Each day they build a new nest. It takes orangutans about 5 minutes to make a nest. After a good night's sleep, orangutans go back to swinging and eating!

Orangutans are not monkeys. They are apes.

FUN FACT:

An orangutan's arms span is about 8 feet! Talk about long arms!

IMPORTANT WORDS

arboreal: to live in trees
tropical: very hot and wet

Reading Fluency Timothy Rasinski,William Rupley,David Paige,Chase Young,2021-01-21 Reading fluency has been identified as a key component of proficient reading Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement Despite the great potential for fluency to have a significant outcome on students reading achievement it continues to be not well understood by teachers school administrators and policy makers The chapters in this volume examine reading fluency from a variety of perspectives The initial chapter sketches the history of fluency as a literacy instruction component Following chapters examine recent studies and approaches to reading fluency followed by chapters that explore actual fluency instruction models and the impact of fluency instruction Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention Two articles on assessment one focused on word recognition and the other on prosody expand our understanding of fluency measurement Finally a study from Turkey explores the relationship of various reading competencies including fluency in an integrated model of reading Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction
