Orangutan

Orangutans live in **tropical** rainforests in Southeast Asia. It's very hot and rainy there. About 8 inches of rain can fall in one day! Orangutans are **arboreal** animals. There's lots of trees in the rainforest! Orangutans are built for life in the trees! They have long arms for swinging from tree to tree. Their arms are so long they almost touch the ground when they stand! Orangutans' hands and feet are shaped like hooks. This makes it easy to grab tree branches!

Orangutans spend about 4 hours a day eating! They like to eat flowers, leaves, and tree bark, but mostly they eat fruit. Orangutans count on their memory to find food. Orangutans are very smart and can remember where fruit trees are in the rainforest. Orangutans' sense of sight also comes in **handy** when finding a meal. They can see very well! Orangutans, however, are not super sniffers! Their sense of smell is not as helpful to them when it comes to finding food.

After a long day, orangutans are ready for a good night's sleep. Orangutans find a spot in a tree and build a nest. They gather leaves and branches for the nest. They even make a roof with big leaves to keep out the rain. Orangutans sleep for about 12 hours each night. Each day they build a new nest. It takes orangutans about 5 minutes to make a nest. After a good night's sleep, orangutans go back to swinging and eating!

Orangutans are not monkeys. They are apes.

FUN FACT:

An orangutan's arms span is about 8 feet! Talk about long arms!

IMPORTANT WORDS

arboreal: to live in trees
tropical: very hot and wet
