The Black-White Test Score Gap Christopher Jencks, Meredith Phillips, 2011-01-01 The test score gap between blacks and whites on vocabulary reading and

math tests as well as on tests that claim to measure scholastic aptitude and intelligence is large enough to have far reaching social and economic consequences In their introduction to this book Christopher Jencks and Meredith Phillips argue that eliminating the disparity would dramatically reduce economic and educational inequality between blacks and whites Indeed they think that closing the gap would do more to promote racial equality than any other strategy now under serious discussion The book offers a comprehensive look at the factors that contribute to the test score gap and discusses options for substantially reducing it Although significant attempts have been made over the past three decades to shrink the test score gap including increased funding for predominantly black schools desegregation of southern schools and programs to alleviate poverty the median black American still scores below 75 percent of American whites on most standardized tests The book brings together recent evidence on some of the most controversial and puzzling aspects of the test score debate including the role of test bias heredity and family background It also looks at how and why the gap has changed over the past generation reviews the educational psychological and cultural explanations for the gap and analyzes its educational and economic consequences The authors demonstrate that traditional explanations account for only a small part of the black white test score gap They argue that this is partly because traditional explanations have put too much emphasis on racial disparities in economic resources both in homes and in schools and on demographic factors like family structure They say that successful theories will put more emphasis on psychological and cultural factors such as the way black and white parents teach their children to deal with things they do not know or understand and the way black and white children respond to the same classroom experiences Finally they call for large scale experiments to determine the effects of schools racial mix class size ability grouping and other policies In addition to the editors the contributors include Claude Steele Ronald Ferguson William G Bowen Philip Cook and William Julius Wilson *Safety Education in the Secondary Schools* Herbert James Stack,1929
