The Brave Tin Soldier

By Hans Christian Andersen

Read the story below.

There were once five-and-twenty tin soldiers, who were all brothers, for they had been made out of the same old tin spoon. They shouldered arms and looked straight before them, and wore a splendid uniform, red and blue. The first thing they ever heard was the words, "Tin soldiers!" uttered by a little boy, when the lid of the box was taken off. They were given him for a birthday present, and he stood at the table to set them up. The soldiers were all exactly alike, excepting one, who had only one leg; he had been left to the last, but they made him to stand firmly on one leg, and this caused him to be very remarkable. When the children came in the next morning, they placed the tin soldier in the window. But the window flew open, and out fell the tin soldier, it was a terrible fall. It began to rain, till there was a heavy shower. When it was over, two boys happened to pass by, and one of them said, "Look, there is a tin soldier. So they made a boat out of a newspaper, and placed the tin soldier in it, and sent him sailing down.

The Causes of High and Low Reading Achievement Ronald P. Carver, 2000-02-01 This book describes all of the important factors that cause some students to have low reading achievement and others to have high reading achievement. It concentrates on the main factors that influence how much a student gains in reading achievement during a year of school or a calendar year. An attempt is made to answer the following questions: what can educators do to increase reading achievement and what is beyond their influence? The author is directly concerned with achievement associated with normal or typical reading. The focus of the book is on things teachers can do during an entire school year that are likely to improve the reading level and reading rate of students, which in turn will increase their reading achievement. This effort to specify the most important causes of high and low reading achievement represents an integration of two disciplines of scientific psychology: experimental psychology and psychometrics. A glossary at the end of the book contains definitions of terms and concepts. Helpful appendices explain reading theory, the three laws of reading theory, and the equations that can be used to predict the accuracy of reading comprehension. Provide conversions among units of reading rate and list the numbered equations presented in the book.

Reading Actively in Middle Grade

Social Studies Don K. Philpot, 2019-08-14 Middle grade students can learn a great deal about themselves and their world by reading informative texts in social studies courses. These texts will focus on important topics in history, geography, civics, government, and economics and offer students a range of perspectives on past and present social events. But reading is a complex act and most students need specific reading-related support to understand assigned texts in middle grade social studies courses. This book focuses on the cyclical nature of reading: the actions proficient readers engage in to understand social studies textbooks and other informational texts and the instructional support that teachers can provide to enhance middle grade students' learning of social studies content through reading. Three associated questions will be addressed in this book: What actions do proficient readers engage in to understand assigned course texts? What do these actions entail and how do they relate to each other? What teacher-mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading?
