Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30. With age appropriate inquiry centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved, and of what students can be expected to learn; a list of accompanying materials; a reading level; and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs; chapters on books about science and teaching; directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the

Expect More: Children Can Do Remarkable Things Anne Grall Reichel, Ed.D., 2010-09-22 This book encourages teachers parents grandparents and volunteers who work with children to expect more It focuses on the skills children will need to compete in a highly competitive global economy From systems thinking to interpreting complex visual images to integrative thinking our children need a whole new skill set For too long science and social studies have been moved to the back burner Ironically these subjects hold great interest and opportunity to investigate concepts in depth We need to bring them to center stage Throughout the book the author provides many concrete examples of ways for teachers and parents to engage children in meaningful conversation and problem solving Somewhere along the way we seem to have stopped challenging children and started enabling them instead Perhaps this is through no fault of our own As teachers and parents we genuinely care about children We feel for them when they are sick when they are bullied or when they are struggling Quite simply it is our nature to protect With the best of intentions we tend to try and eliminate the struggle But the struggle is essential to growth and a personal sense of accomplishment As children work their way through challenges they build the confidence and habits of mind needed to embrace the next challenge that comes along This book is an invitation to adults to expect more of themselves and of the children they care about The invitation is yours to accept
