student is already achieving this percentage the other guides or web site with random questions and covering all material might be best A book might be better for your student than the web sites for two reasons 1 The more common and easiest questions are using a ruler to measure The web designers don t know the size of your computer screen and can t determine if the student has measured correctly We can get a high percentage of these problems easily 2 When studying on a computer there are too many websites with the answers With a book parents can have greater assurance the work is being done This book is developed by a trained professional out of concern It is not the product of a large publishing house It is the results of one person who wants to help Best Regards Mark Shannon *Houghton Mifflin Social Studies Georgia* ,2006-01-10
