Instruction Grammar Simon Kasper, 2015-07-24 Bringing together evidence from natural and social sciences the work introduces the non reductionist Instruction Grammar programme Viewed from within the practicalities of the lifeworld utterances are described as instructions to simulate perceptions and attributions for action The approach provides solutions to long standing philosophical problems of cognitive grammar theories and traditionally puzzling syntactic phenomena

Mathematics and Sports Leonid Efimovich Sadovskii, Aleksei Leonidovich Sadovskii, 1993 Some scientists claim that strong tobacco and spirits clear the head and spur creativity It would be well however to try other means to exercise jog swim or learn to play games like tennis basketball badminton volleyball and so on Not only checkers chess cards or billiards are a source of interesting problems Other sports provide them as well Mathematical methods are increasingly applied in sports Just think how many yet unsolved problems arise when we study the interaction between ball and racket or between ball and court from the introduction This unique book presents simple mathematical models of various aspects of sports with applications to sports training and competitions Requiring only a background in precalculus it would be suitable as a textbook for courses in mathematical modeling and operations research at the high school or college level Coaches and those who do sports will find it interesting as well The lively writing style and wide range of topics make this book especially appealing

The Oxford Handbook of Comparative Law Mathias Reimann, Reinhard Zimmermann, 2006-11-16 The Oxford Handbook of Comparative Law provides a wide ranging and highly diverse critical survey of comparative law at the beginning of the twenty first century It summarizes and evaluates a discipline that is time honoured but not easily understood in all its dimensions In the current era of globalization this discipline is more relevant than ever both on the academic and on the practical level The Handbook is divided into three main sections Section I surveys how comparative law has developed and where it stands today in various parts of the world This includes not only traditional model jurisdictions such as France Germany and the United States but also other regions like Eastern Europe East Asia and Latin America Section II then discusses the major approaches to comparative law its methods goals and its relationship with other fields such as legal history economics and linguistics Finally section III deals with the status of comparative studies in over a dozen subject matter areas including the major categories of private economic public and criminal law The Handbook contains forty two chapters which are written by experts from around the world The aim of each chapter is to provide an accessible original and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come Each chapter also includes a short bibliography referencing the definitive works in the field
