*Roman Villas in Central Italy* Annalisa Marzano, 2007-08-31 This volume which was awarded Honorable Mention and a Silver Medal from the Premio Romanistico Internazionale Gerard Boulvert investigates the socio economic role of elite villas in Roman Central Italy drawing on both documentary sources and material evidence Through the composite picture emerging from the juxtaposition of literary texts and archaeological evidence the book traces elite ideological attitudes and economic behavior caught between what was morally acceptable and the desire to invest capital intelligently The analysis of the biases affecting the application of modern historiographical models to the interpretation of the archaeology frames the discussion on the identification of slave quarters in villas and the putative second century crisis of the Italian economy The book brings an innovative perspective to the debate on the villa system and the decline of villas in the imperial period

**The Roman Villa** Alfred Frazer, 1998-01-29 This edited volume based on the first Williams Symposium on Classical Architecture held at the University of Pennsylvania in April 1990 focuses on the theme of the well appointed Roman country house Using archaeological and textual evidence the chapters address issues of villa composition economy and society The volume also explores the possible reasons that Greeks did not embrace the villa lifestyle as the Romans so eagerly did Finally this book provides a promising foundation for future studies of the nature of the villa phenomenon Contributors Lisa Fentress Chrystina Huber Adolf Hoffmann Ann Kuttner Hans Lauter Guy Métraux

Richard Neudecker Andrew Wallace Hadrill Symposium Series 9 University Museum Monograph 101 **The Roman Villa in the Mediterranean Basin** Annalisa Marzano, Guy P. R. Métraux, 2018-04-30 This volume offers a comprehensive survey of Roman villas in Italy and the Mediterranean provinces of the Roman Empire from their origins to the collapse of the Empire The architecture of villas could be humble or grand and sometimes luxurious Villas were most often farms where wine olive oil cereals and manufactured goods among other products were produced They were also venues for hospitality conversation and thinking on pagan and ultimately Christian themes Villas spread as the Empire grew Like towns and cities they became the means of power and assimilation just as infrastructure such as aqueducts and bridges was transforming the Mediterranean into a Roman sea The distinctive Roman Italian villa type was transferred to the provinces resulting in Mediterranean wide culture of rural dwelling and work that further unified the Empire **Official Power and Local Elites in the Roman Provinces** Rada Varga, Viorica Rusu-Bolindeț, 2016-11-25 Presenting a new and revealing overview of the ruling classes of the Roman Empire this volume explores aspects of the relations between the official state structures of Rome and local provincial elites The central objective of the volume is to present as complex a picture as possible of the provincial leaderships and their many and varied responses to the official state structures The perspectives from which issues are approached by the contributors are as multiple as the realities of the Roman world from historical and epigraphic studies to research of philological and linguistic interpretations and from architectural analyses to direct interpretations of the material culture While some local potentates took pride in their relationship with Rome and their use of Latin exhibiting their allegiances publicly as well as privately others preferred to keep this display solely for public manifestation These complex and complementary pieces of research provide an in depth image of the power mechanisms within the Roman state The chronological span of the volume is from Rome's Republican conquest of Greece to the changing world of the fourth and fifth centuries AD when a new ecclesiastical elite began to emerge **Art of the Classical World in the Metropolitan Museum of Art** Metropolitan Museum of Art (New York, N.Y.), Carlos A. these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English re conquest and replaced with the counties with which we are familiar today
