students aiming for top scores in the Physics board exam Whether for concept revision or practicing past papers it is the
perfect guide to boost confidence and ensure success Mirror to Physiology Ralph W Gerard, 2013-05-27 This is a motley
document the product of many presented for what it is Fondly conceived as another Flexner report it lacked a Flexner to
produce it The excitement of planning by varied committees was not always maintained through execution communication
necessarily difficult was strained by im portant changes in operating staff questions were forgotten by the time answers
became available too much was undertaken with inadequate experi ence and funds large though the support seemed multiple
purposes and distributed responsibility caused confusion and delay the inevitable and evi table hazards of an extended

undertaking exacted their full toll As a result the report is seriously late in appearing and it lacks important portions of the anticipated perspectives along time and across disciplines But high devotion and hard labor have been poured into the mold and the finished creation is not without merit The Survey did pioneer in formulating a study of a profession and its struggles have supplied both guidance and warning to many followers It did amass great chunks of new data collate older information and make interpretations of the whole which have been put to use long before this report was completed And it did catalyze much other successful activity especially in the area of education by the American Physiological Society and its sister organizations and by agents of other interests from mathematics to medical schools
