is not standard in the school curriculum are included. However many topics in the book are difficult when you start learning them from scratch. To help with this problems are carefully arranged to provide gradual introduction into each subject. Problems are often accompanied by hints and or complete solutions. The book is based on classes taught by the author at different times at the Independent University of Moscow at a number of Moscow schools and math circles and at various summer schools. It can be used by high school students and undergraduates their teachers and organizers of summer camps and math circles. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession.
