Testament Social Ethics for Today and Galatians Word Biblical Commentary is centered on the theme of gospel in Paul. Notable Pauline scholars discuss gospel from five different perspectives: the historical, the theological, the hermeneutical, the rhetorical, and the epistolary. Each author discusses one of these five perspectives within one part of Paul's correspondence: 1 Gospel in Romans, 2 Gospel in Galatians, and 3 Gospel in the Corinthian letters. The volume promotes discussion both on methods of reading Paul's letters and on important historical, theological, and hermeneutical issues.

Teaching Young Second Language Learners Rhonda Oliver, Bich Nguyen, 2018-06-12. Adopting a learner-centred approach that places an emphasis on hands-on child SL methodology, this book illustrates the practices used to teach young second language learners in different classroom contexts: 1 English as an Additional Language or Dialect (EAL/D) both intensive EAL/D and EAL/D in the mainstream; 2 Language Other Than English (LOTE); 3 Content and Language Integrated Learning (CLIL); 4 Indigenous; 5 Foreign Language (FL). It will be particularly useful to undergraduate teachers to build upon the literacy unit they undertake in the first years of their course to explore factors that constitute an effective child SL classroom and, in practical terms, how to develop such a classroom. The pedagogical strategies for teaching young language learners in the six chapters are firmly guided by research-based findings, enabling not only pre-service teachers but also experienced teachers to make informed choices of how to effectively facilitate the development of the target language, empowering them to assume an active and effective role of classroom practitioners.

Education and Inequality in India Manabi Majumdar, Jos Mooij, 2012-10-02. This book focuses on primary education in India and interrogates what schooling means and does to children from weaker sections of Indian society and which values underpin the school system. It examines whether the concept of education for all is just a mechanically conceived policy target to chasing enrolment and attendance or whether it is a larger social goal and a deeper political statement about the need for attacking entrenched social inequalities and, above all, an affirmation of the idea that schooling has a liberating potential. Drawing on original data collected in the two states of Andhra Pradesh and West Bengal, the authors first present the multiple ways in which social class impinges on the educational system, educational processes, and educational outcomes. In the second part of the book, issues around autonomy and accountability are explored via an analysis of the position of teachers within the educational hierarchy and by looking at the various possibilities of making teachers accountable. The last part centres on the learning process with a particular focus on the classroom. The conclusion includes recommendations that are related to the necessity for a larger debate and normative framework which includes private schools as possible partners in the pursuing of a public good for which a public entity should take some responsibility and, in conjuncture to that, the necessity to move from government action and responsibilities to a broader concept of public action.
