General comments

The paper successfully separated the candidates, with a pleasing number performing very well. Candidates must remember to read all the words of the stem carefully – there is usually a key phrase which leads them to the correct response or sets the scene of the particular question. For example, in **Question 38**, all the F_1 are spotted leopards. With no black F_1 's the spotted ones must be heterozygous.

Some questions proved very easy, and while they are included to give confidence and encourage weaker or more nervous candidates, they are less help in the grading of candidates. These included **Questions 1, 7, 8, 28, 33 and 36**.

Straightforward questions, largely requiring knowledge, included **Questions 2, 11, 13, 14, 17, 20, 24, 26, 31, 34 and 37**.
