*MEDINFO 2019: Health and Wellbeing e-Networks for All* L. Ohno-Machado, B. Séroussi, 2019-11-12. Combining and integrating cross institutional data remains a challenge for both researchers and those involved in patient care. Patient generated data can contribute precious information to healthcare professionals by enabling monitoring under normal life conditions and also helping patients play a more active role in their own care. This book presents the proceedings of MEDINFO 2019, the 17th World Congress on Medical and Health Informatics held in Lyon, France from 25 to 30 August 2019. The theme of this year's conference was Health and Wellbeing E Networks for All, stressing the increasing importance of networks in healthcare on the one hand and the patient centered perspective on the other. Over 1100 manuscripts were submitted to the conference and after a thorough review process by at least three reviewers and assessment by a scientific program committee member 285 papers and 296 posters were accepted together with 47 podium abstracts, 7 demonstrations, 45 panels, 21 workshops and 9 tutorials. All accepted paper and poster contributions are included in these proceedings. The papers are grouped under four thematic tracks: interpreting health and biomedical data supporting care delivery, enabling precision medicine and public health and the human element in medical informatics. The posters are divided into the same four groups. The book presents an overview of state of the art informatics projects from multiple regions of the world; it will be of interest to anyone working in the field of medical informatics.
