Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various

education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies

Why Does Development Fail in Resource Rich Economies Elissaios Papyrakis, 2019-05-17 There has been a lot of interest within the scientific and policy communities in the resource curse that is the tendency of mineral rich economies to turn into development failures Yet after more than 20 years of intensive research and action the curse still lingers as a very real global problem because of volatile mineral prices bad governance and conflict This book incorporates current original research on the resource curse from some of the most prominent contributors to this literature combined with a critical reflection on the current stock of knowledge It is a unique attempt to provide a more holistic and interdisciplinary picture of the resource curse and its multi scale effects This edited volume reflects the current academic diversity that characterises the resource curse literature with a mix of different

methodological approaches both quantitative and qualitative analyses and a diverse geographical focus Latin America Sub Saharan Africa global Taken together the studies emphasize the complexities and conditionalities of the curse its presence intensity being largely context specific depending on the type of resources socio political institutions and linkages with the rest of the economy and society This book was originally published as a special issue of the Journal of Development Studies

The Challenge of Governance in South Sudan Steven C Roach,Derrick K Hudson,2018-09-13 South Sudan is one of the world s most divided and unstable countries Since achieving statehood in 2011 the country has plunged into civil war 2013 15 and become the scene of some of the worst human rights abuses on the African continent Despite ongoing political turmoil states and international institutions have pledged enormous resources to stabilize the country and shore up the current peace process but have had limited influence in dealing with the effects of rampant corruption and factionalism The Challenge of Governance in South Sudan examines the factors that continue to haunt peace building efforts including the domination of the SPLM A factionalization corruption human rights atrocities an ineffective constitution and the role of international actors It brings together a diverse set of leading scholars to reflect on these factors and propose ways of promoting peace and stability in South Sudan In particular the book asks whether the disparity between domestic priorities policies and foreign intervention strategies has prevented the peace process from moving forward The contributors probe this issue by addressing the flaws of past peace agreements poor governance a weakly articulated peacekeeping mission US foreign policy and a lack of moral accountability This book is perfect for students scholars and policy makers with an interest in the challenges faced by the world s newest country

Current Challenges in Cardiovascular Molecular Diagnostics

Matteo Vatta,Valeria Novelli,Luisa Mestroni,Jeffrey A. Towbin,Carlo Napolitano,Guia Guffanti,2017-09-12 The field of cardiovascular genetics has tremendously benefited from the recent application of massive parallel sequencing technology also referred to as next generation sequencing NGS However along with the discovery of additional genes associated with human cardiac diseases the analysis of large dataset of genetic information uncovered a much more complex and variegated landscape which often departs from the comfort zone of the monogenic Mendelian diseases image that clinical molecular geneticists have been well acquainted with for many decades It is now clear that in addition to highly penetrant genetic variants which in isolation are able to recapitulate the full clinical presentation when expressed in animal models we are now aware that a small but significant fraction of subjects presenting with cardiac muscle diseases such as cardiomyopathies or primary arrhythmias such as long QT syndrome LQTS may harbor at least two deleterious variants in the same gene compound heterozygous or in different gene double heterozygous Although the clinical presentation in subjects with more than one deleterious variant appears to be more severe and with an earlier disease onset it somehow changes the viewpoint of clinical molecular geneticists whose aim is to identify all possible genetic contributors to a human condition In this light the employment in clinical diagnostics of the NGS technology allowing the simultaneous interrogation of a DNA target

spanning from large panel of genes up to the entire genome will definitely aid at uncovering all such contributors which will have to be tested functionally to confirm their role in human cardiac conditions The uncovering of all clinically relevant deleterious changes associated with a cardiovascular disease would probably increase our understanding of the clinical variability commonly occurring among affected family relatives and potentially provide with unexpected therapeutic targets for the treatment of symptoms related to the presence of accessory deleterious genetic variants other than the key molecular culprit The objective of this Research Topic is to explore the current challenges presenting to the cardiovascular genetics providers such as clinical geneticists genetic counselors clinical molecular geneticists and molecular pathologists involved in the diagnosis counseling testing and interpretation of genetic tests results for the comprehensive management of patients affected by cardiovascular genetic disorders

Atrial Fibrillation: Selection of Management Strategy and Evaluation of Outcomes Rui Providencia, Serge Boveda, Teresa Strisciuglio, Alexandre Almorad, 2024-09-13 Atrial fibrillation AF is an increasing arrhythmia disease its pathophysiology is the subject of many studies Rate and rhythm control along with stroke prophylaxis are the cornerstones of AF therapy With the recent evolution of techniques AF ablation is becoming the first therapeutic option in many centres worldwide Pulmonary vein isolation PVI for paroxysmal AF is now well established Additional methods are now rising with non PV trigger ablation such as drivers posterior wall isolation epicardial ablation Recognition of physiopathological signature for AF is the next challenge for all rhythmologists This will be achieved only by collecting different inputs such as imagery and mapping This Research Topic will focus on how to define a persistent AF ablation strategy and evaluate its outcome What is the role of pre ablation imagery MRI ultrasound CT in elaborating an AF ablation strategy Could post ablation imagery be a tool to evaluate the success of an ablation Furthermore the different and complex mechanisms initiating and maintaining AF are still under investigation leading to the absence of consensus for ablation treatment What are the roles played by the new mapping tools along with their algorithms regarding the outcome of ablation The recent development of new ablation technologies catheters such as Pulse Field Ablation and Radiofrequency balloon are bringing a lot of questions regarding long term results of PVI and non PV trigger ablation **Library**
