Opportunity to Learn, Curriculum Alignment and Test Preparation Jaap Scheerens, 2016-08-30 This book provides a review of the effectiveness of Opportunity to Learn OTL operationalized as the association between OTL and student achievement In addition it presents an elaborate conceptual map in which OTL is regarded as part of a larger concept of curriculum alignment Major components of this framework are national goals and standards school curricula formative tests textbooks actual delivery of content as part of teaching and summative tests and examinations Alignment between educational goals intended and implemented curricula and educational outcomes is considered an important prerequisite for effective education The expectation is that better alignment leads to better student performance The concept of OTL is commonly used to compare content covered as part of the implemented curriculum with student achievement As such it is to be seen as a facet of the broader concept of alignment As it comes to enhancing OTL in educational policy and practice proactive curriculum development is compared to a more retroactive orientation Legitimate forms of test and examination preparation belong to this retroactive orientation and are seen as favorable conditions for optimizing OTL This book reviews the research evidence on the effects of OTL on student achievement by means of detailed descriptions of key empirical studies a review of meta analyses a vote count syntheses of 51 empirical studies conducted between 1995 and 2015 and a secondary analysis based on TIMSS 2011 and PISA 2012 data It concludes that the effect size of OTL at about 30 is modest but comparable in size to other effectiveness enhancing conditions in schooling The final chapter of the book provides suggestions for educational policy and practice to further optimize OTL div

Transforming Curriculum Through Teacher-Learner Partnerships Nair, Pradeep, Keppell, Michael James, Lim, Chee Leong, Mari, TamilSalvi, Hassan, Nurhanim, 2020-12-11 Empowering learners for life requires a fundamental shift in higher education curriculum design New priorities pedagogies technologies spaces and assessment strategies are required to enable learners to take ownership of their learning Student centeredness concepts are still prescriptive in nature as most decisions on curriculum assessment

teaching and learning approaches are still teacher centric Teachers are developing student centered learning environments without the involvement of the learners in the planning decision making and or design process In addition some lecturers are still practicing the traditional approaches of content delivery and conventional assessment methods rather than experimenting with innovative practices suited for student centered approaches Therefore there is an ongoing need for research focused on the importance and effectiveness of a paradigm shift in education that involves student teacher partnerships fueled by innovative teaching and learning designs where students take an active role and contribute as partners in learning Transforming Curriculum Through Teacher Learner Partnerships captures experiences and evidence among teachers in exploring the possibility of active student participation in curriculum design delivery and assessment through teacher learner partnership The chapters address issues of teacher learner partnerships in designing the learning environment and how student centered methods create resilient adaptable and future capable learners While highlighting topics within this scope such as learner autonomy learning performance self efficacy and teaching pedagogy this book is ideally intended for teachers administrators teacher educators practitioners stakeholders researchers academicians and students interested in issues related to the teacher learner partnership

Building the Foundation: Whole Numbers in the Primary Grades Maria G. Bartolini Bussi,Xu Hua Sun,2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country

to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts
