The Cost-Benefit Revolution Cass R. Sunstein, 2019-09-24 Why policies should be based on careful consideration of their costs and benefits rather than on intuition popular opinion interest groups and anecdotes Opinions on government policies vary widely Some people feel passionately about the child obesity epidemic and support government regulation of sugary drinks Others argue that people should be able to eat and drink whatever they like Some people are alarmed about climate change and favor aggressive government intervention Others don't feel the need for any sort of climate regulation In *The Cost Benefit Revolution* Cass Sunstein argues our major disagreements really involve facts not values It follows that government policy should not be based on public opinion intuitions or pressure from interest groups but on numbers meaning careful consideration of costs and benefits Will a policy save one life or one thousand lives Will it impose costs on consumers and if so will the costs be high or negligible Will it hurt workers and small businesses and if so precisely how much As the Obama administration's regulatory czar Sunstein knows his subject in both theory and practice Drawing on behavioral economics and his well known emphasis on nudging he celebrates the cost benefit revolution in policy making tracing its defining moments in the Reagan Clinton and Obama administrations and pondering its uncertain future in the Trump administration He acknowledges that public officials often lack information about costs and benefits and outlines state of the art techniques for acquiring that information Policies should make people's lives better Quantitative cost benefit analysis Sunstein argues is the best available method for making this happen even if in the future new measures of human well being also explored in this book may be better still

EU Global Strategy and Human Security Mary Kaldor, Iavor Rangelov, Sabine Selchow, 2018-04-17 This volume examines the EU's Global Strategy in relation to human security approaches to conflict Contemporary conflicts are best understood as a social condition in which armed groups mobilise sectarian and fundamentalist sentiments and construct a predatory economy through which they enrich themselves at the expense of ordinary citizens This volume provides a timely contribution to debates over the role of the EU on the global stage and its contribution to peace and security at a time when these discussions are reinvigorated by the adoption of the EU Global Strategy It discusses the significance of the Strategic Review and the Global Strategy for the re-articulation of EU conflict prevention crisis management peacebuilding and development policies in the next few years It also addresses the key issues facing EU security in the 21st century including the conflicts in Ukraine Libya and Syria border security cyber security and the role of the private security sector The book concludes by proposing that the EU adopts a second generation human security approach to conflicts as an alternative to geopolitics or the War on Terror taking forward the principles of human security and adapting them to 21st century realities This book will be of interest to students of human security European

Climate change and agriculture in the Sudan: Impact pathways beyond changes in mean rainfall and temperature Siddig, Khalid, Stepanyan, Davit, Wiebelt, Manfred, Zhu, Tingju, Grethe, Harald, 2018-09-26 Several environmental changes have occurred in the Sudan in the past several are ongoing and others are projected to happen in the future The Sudan has witnessed increases in temperature floods rainfall variability and concurrent droughts In a country where agriculture which is mainly rainfed is a major contributor to gross domestic product foreign exchange earnings and livelihoods these changes are especially important requiring measurement and analysis of their impact This study not only analyzes the economy wide impacts of climate change but also consults national policy plans strategies and environmental assessments to identify interventions which may

mitigate the effects We feed climate forcing water demand and macro socioeconomic trends into a modelling suite that includes models for global hydrology river basin management water stress and crop growth all connected to the International Model for Policy Analysis of Agricultural Commodities and Trade IMPACT The outcomes of this part of the modeling suite are annual crop yields and global food prices under various climate change scenarios until 2050 The effects of such changes on production consumption macroeconomic indicators and income distribution are assessed using a single country dynamic Computable General Equilibrium CGE model for the Sudan Additionally we introduce yield variability into the CGE model based on stochastic projections of crop yields until 2050 The results of the model simulations reveal that while the projected mean climate changes bring some good news for the Sudan extreme negative variability costs the Sudan cumulatively between 2018 and 2050 US 109.5 billion in total absorption and US 105.5 billion in GDP relative to a historical mean climate scenario without climate change Shared Governance for Sustainable Working Landscapes Timothy M.

Gieseke, 2016-08-05 Sustaining our agricultural landscapes is no longer just a technical scientific or even political problem but it has evolved into a socially complex so called wicked problem of conflicting social governance and economics This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse and the transactions costs remain high and multiple Using Uber like business platform technology and a shared governance model a symbiotic demand for environmental benefits is created Enabling multi sector transactions for environmental benefits this platform innovation would remedy the tragedy of the commons the economic nemesis to achieving landscape sustainability In a nutshell to sustain our agricultural landscapes a transdisciplinary approach supported by a shared governance model housed within a multi sided platform is needed This book introduces an assessment framework identifying governance actors styles and ratios for socio ecological systems The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks It is aimed to anyone involved in sustainability science agricultural policy planning or integrated landscape design Africa's Lions Haroon Borat, Finn

Tarp, 2016-11-08 Examining the economic forces that will shape Africa's future Africa's Lions examines the economic growth experiences of six fast growing and or economically dominant African countries Expert African researchers offer unique perspectives into the challenges and issues in Ethiopia Ghana Kenya Mozambique Nigeria and South Africa Despite a growing body of research on African economies very little has focused on the relationship between economic growth and employment outcomes at the detailed country level A lack of empirical data has deprived policymakers of a robust evidence base on which to make informed decisions By harnessing country level household firm and national accounts data together with existing analytical country research the authors have attempted to bridge this gap The growth of the global working age population to 2030 will be driven primarily by Africa which means that the relationship between growth and employment should be understood within the context of each country's projected demographic challenge and the associated implications

for employment growth A better understanding of the structure of each country s workforce and the resulting implications for human capital development the vulnerably employed and the working poor will be critical to informing the development policy agenda As a group the six countries profiled in Africa s Lions will largely shape the continent s future Each country chapter focuses on the complex interactions between economic growth and employment outcomes within the individual Africa s Lions context
