Slices & Lumps Lee Anne Fennell,2019-09-16 How things are divided up or pieced together matters Half a bridge is of no use at all Conversely many things would do more good if they could be divided up differently Perhaps you would prefer a job that involves a third less work and a third less pay or a car that materializes only when needed and is priced accordingly Difficulties in slicing and lumping shape nearly every facet of how we live and work and a great deal of law and policy as well Lee Anne Fennell explores how both types of challenges carving out useful slices and assembling useful lumps surface in myriad contexts from hot button issues like conservation and eminent domain to developments in the sharing economy to personal struggles over work money time diet and exercise Yet the significance of configuration is often overlooked leading to missed opportunities for improving our lives With a technology fueled entrepreneurial explosion underway that is dividing goods services and jobs in novel ways and as

urbanization and environmental threats raise the stakes for assembling resources and cooperation this is an especially exciting and crucial time to confront questions of slicing and lumping The future of the city the workplace the marketplace and the environment all turn on matters of configuration as do the prospects for more effective legal doctrines for better management of finances and health and more This book reveals configuration s power and potential as a unifying concept and as a focus of public and private innovation *Social Studies Education in East Asian Contexts* Kerry J.

Kennedy,2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies **Singapore Lower Secondary**
