**and Group Actions in Arbitration** Bernard Hanotiau, Eric A. Schwartz, 2016-09-23 Several decades ago a typical arbitration  
 would involve one claimant against one respondent Over the years more and more cases involve several claimants against  
 several respondents Today one third of all international ICC arbitrations seem to involve multiparty cases multi contract  
 cases involving multiple contracts multiple parties The evolution has continued and the debate today is whether it would be  
 possible for a class of people in the same situation or a group of citizens having the same interest to start one single  
 arbitration procedure as a group or as a class This publication examines the complex issues involved in class or group  
 arbitration on a comparative law basis Is there a place for such proceedings within the framework of the arbitration process  
 Class action procedures as developed in the United States court system and more recently in Canada are almost nonexistent  
 in Europe The European Commission has advocated collective redress as an important means of access to justice but class  
 actions have found little enthusiasm in the Member States The book highlights the lessons which have been learned from  
 the experience of cases in the US and in Europe What does the future hold for class collective and mass arbitrations Are they  
 a marginal phenomenon or has their potential yet to be realized What are possible solutions to the issues that have been  
 encountered Can we expect to see more of such arbitrations in the future Written by arbitrators academics and practitioners  
 this Dossier will provide the answers to these questions and many more **Crises in Europe in the Transatlantic**

**Context** Bruno Dallago, John McGowan, 2015-01-30 The adoption and management of the common currency has led the  
 Eurozone to a critical point This book analyzes in an interdisciplinary way the fundamental causes of distress making sure to  
 relate economic issues to the social and political aspects of the problem The book explores the reasons why the Eurozone has

fallen into a policy trap as well as what Europe did and should do to exit the crisis and why this is proving to be so difficult. The book also considers what role the United States has played and could play to help foster a solution for the Eurozone. The main topics explored are the complex nature of the crisis, the short circuit between policies and the given institutional architecture, the controversial role of Germany and the importance of an active role of the US. The book brings together a transatlantic group of scholars in order to offer an interdisciplinary analysis of the deep causes of the Eurozone distress. The authors recognize that the Eurozone countries have contrasting situations and interests and face different problems with complex consequences for the vexed question of national sovereignty within the EU and pay attention to the social and political consequences of the economic and financial distress and of the perceived strain of the common currency.

weaker states does not result from easy applications of power rather it tends to be mediated through the competing interests of target state actors the imperatives of other existing security and economic relationships and more complex strategic thinking than we might expect The book s findings carry lessons for conceptual refinement as well as policy implications for those coping with China s reshaping of international order

*The Political Economy and Media Coverage of the European Economic Crisis* Julien Mercille,2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter s aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe s peripheral countries Through a systematic analysis of Ireland s main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis
