Although we tend to expect 'elasticated' audio files as standard these days, it wasn't until ACID came along (all the way back in 1998) that we first had access to a completely intuitive, flexible way of creating loop-based music. Since then, an increasing number of DAWs have gone on to implement this kind of functionality, from Ableton's Live – which spun the concept into interactive, 'live' loop-juggling – to Apple's own version of the ACID Loop, the Apple Loop. The original ACID was developed by Sonic Foundry (which also brought us Sound Forge and Vegas) and then latterly acquired by Sony as part of its ever-expanding media division. Under Sony's wing the program has grown,

both as a music-production tool, but equally in audiovisual circles for soundtrack creation.

In recent years, however, the application has felt somewhat restricted by its loop-based focus. Although ACID was great for knocking together the bare bones of a track, it lacked the features of a traditional DAW – namely, MIDI and audio recording – that enabled tracks to be embellished and developed. As a result, most users chose to run ACID Pro either as a ReWire slave or render

### The ACID test

As well as the application itself, ACID Pro 6 comes with more than 1,000 Sony Sound Series loops and Native Instruments' Kompakt player, so you can get straight to work and start exploring its features. The starting point of a song will often be a quick browse through ACID Pro's Media Manager – arguably the heart of any loop-based arrangement program. The Media Manager is intuitive and easy to use, enabling you to select appropriate loops or single-shot sounds to preview

its output and carry out the rest of their creative work in another application. What those users will be pleased to hear, therefore, is that ACID Pro 6 is now a serious, fully functional DAW, complete with 24-bit, 192kHz sound quality, 5.1 support, MIDI sequencing, VST and DirectX audio plug-ins, plus control surface integration.

in your arrangement. For example, you could filter files by genre (industrial, blues, folk, rock) or instrument type (bass, strings, electronic drums and so on). Usefully, the loop will also play back in time with the current track and has its own preview volume, enabling you to accurately judge how it will sit in the mix.
