Scope: The Combat Hunter Trainer Course enhances the safety and security of Marines across the range of military operations, whether in garrison, on liberty, or on the battlefield. Marines are trained to observe and recognize human behaviors, patterns, and trends that are indicative of a threat and to act on that threat quickly and decisively through an improved and matured decision-making process. The Marine receives training in planning, conducting, and evaluating training events to include classes on small unit training and unit training management. Combat Hunter training includes: Introduction to Combat Hunter Observation Devices, Criminal and Insurgent Networks, Decision Cycle, Enhanced Observation, KIM Technique, Introduction to Profiling, Heuristics, Profiling Domains, Terrorist Planning Cycle, Tactical Questioning, Analyze and Interpret, Spoof, Individual Actions in a Tracking Team, Track Exploitation, Leading a Tracking Team, and Tactical Site Exploitation. DEFINITION AND MISSION OF THE COMBAT HUNTER: A combat hunter selects, uses, and maximizes the appropriate optics available to see objects and events both hidden and distant. These optics range from the naked eye to advanced optical systems. A combat hunter, through attention to detail, establishes a baseline of an environment and detects the anomalies located within that environment. A combat hunter tracks humans and vehicles by reading the natural terrain. He pursues an armed enemy and gathers data that may suggest the enemy's action and intent. The combat hunter is the creation of a mindset through the integration of enhanced observation, combat profiling, and combat tracking. This mindset will enable Marines to locate close

with and destroy an elusive enemy that hides among the population and uses asymmetric tactics to attack our forces By utilizing enhanced observation combat profiling and combat tracking a Marine is more lethal survivable and tactically cunning He becomes a force multiplier to his unit s operations **OBSERVATION** Observation begins with the gathering and processing of information obtained through the senses The five sensory systems are sight hearing smell touch and taste that allow information to be collected from the environment Perception is the process that the mind uses to organize the sensory information into an understandable interpretation of the environment Central to all these skills is a critically thinking Marine whose decisions can be affected by numerous factors both external and internal The Marine refines his decision making capabilities by understanding the decision cycle process and his awareness of the physical and biological responses he goes through when faced with a dynamic situation Refining these skills and understanding the effects they have on his mind and body make him more capable and more lethal Technical Manual TM 9-1240-416-13&P Operator and Field Maintenance Manual Including Repair Parts and Special Tools List for the M150 Sight, Rifle Combat Optic (RCO) (NSN United States Government US Army,2019-01-12 This manual Technical Manual TM 9 1240 416 13 P Operator and Field Maintenance Manual Including Repair Parts and Special Tools List for the M150 Sight Rifle Combat Optic RCO NSN 1240 01 557 1897 Change 1 is the complete operator s manual armorer s manual and maintainer s manual for the M150 Rifle Combat Optic ACOG *Handbook of Clinical Laboratory Testing During Pregnancy* Ann M.
