Sometimes they contain a single work but often enough they contain compilations of diverse material which at first sight shows little coherence to the modern reader and rightly so. In a way such miscellanies are mini libraries. Nevertheless they are storehouses of wholesome learning in their own right. Further study reveals a rationale in such collections that leads us to a monastic learning environment in some cases even to the classroom. The present volume demonstrates how the study of texts and manuscripts combined opens up windows on the early medieval world of learning as represented by glossaries, proto encyclopedias, biblical companions, hagiographical guides, didactic verse or descriptions of the world in word and image. The essays demonstrate that scholars have too often concentrated on the study of single texts but especially that the compilations of manuscripts and libraries reflect the kind of knowledge that was required of monks, ministers and missionaries for the contemplation, celebration and promulgation of the Christian message.

Gr. 2-3, *Taxes and Authority in the Late Antique Countryside* Matthias Stern, 2025-01-27. How did the late Roman Empire operate in rural areas where most of its subjects lived? The papyri from Egypt provide glimpses of state activity at the local level, how the countryside responded to it, and thus how empire looked on the ground. Since a major motivator for state activity at the local level was tax collection, *Taxes and Authority in the Late Antique Countryside* homes in on the pagarchs, key fiscal actors at the intersection between provincial city and village institutions from the fourth through the seventh centuries CE. The book contextualizes the pagarchs' dealings, backgrounds and networks from the imperial sphere to the village level, exploring topics such as tax collection procedures in the villages, central accounting and staffing in the cities, the competition of local aristocrats over the countryside, official careers and local agency versus imperial policy. The result is an analysis of the social mechanics of the fiscal regime in a region of the imperial periphery. Exploring the abundant and diverse papyrological source material, this book offers a uniquely detailed insight into the dynamic relationship between the Roman Empire and local communities in late antiquity.

The Sword and the Stylus Leo G. Perdue,2008-06-10 The all too frequent disregard of historical and social contexts by many wisdom scholars often leads to the distortion of this literature and transforms its teachings into abstract ideas lacking any incarnation in the social and historical world of human living Leo Perdue here argues from a sociohistorical approach that the proper understanding of ancient wisdom literature requires one to move out of the realm of philosophical idealism into the flesh and blood of human history Arguing that wisdom was international in practice and outlook Perdue traces the interaction between both ruling and subject nations and their sages who produced their respective cultures and their foundational worldviews While not always easy to reconstruct he acknowledges the historical and social settings of texts provide necessary contexts for interpretation and engagement by later readers and hearers Wisdom texts did not transcend their life settings to espouse values regardless of time and circumstance Rather they are located in a variety of historical events in an evolving nation reflecting a vast array of different and changing moral systems epistemologies and religious understandings **Third Grade Skills Review** Brighter Vision,Brighter Vision Publishing Staff,2000-06 **Novo**
