Exploration Surajit De Mandal, G. Ramkumar, S. Karthi, Fengliang Jin, 2022-05-03 This book discusses different approaches for successful pest management through biotechnological interventions. Pest management is directly associated with the agricultural productivity. The book introduces the reader to various kinds of biopesticides that have been developed and are being developed for field application. Chemical pesticides have been widely used to control pests and these induce pesticide resistance as well as other environmental problems. This book discusses the necessity to develop alternate pest control strategies especially environment friendly and target specific biopesticides against destructive pests. The book describes important aspects such as microbial biopesticides, plant based biopesticides, natural products that act against pests and the various other biotechnological advances and limitations of these biopesticides. It provides an in depth knowledge of the latest research and development in the area of biopesticides. This informative book is meant for students and researchers in the fields of biotechnology, agriculture and applied microbiology. **A Knowledge Base for Teacher Education and**
